Ancient indigenous legends have often spoken of Shambhala,
a pure land or fabulous kingdom, whose reality is visionary
or spiritual as much as physical or geographic

Shambhala is an other-worldly oceanic wilderness of 106 uninhabited coral atoll islands and surrounding seas, home to numerous critically endangered and endemic species. It represents one of the last pristine eco-systems on Earth.

By invitation-only, Shambhala is dedicated to supporting the journeys of emerging and experienced change makers who are tackling issues that threaten humanity and our planet.

Touching less than 1% of the land, our collection of boutique carbon-zero private island estates will connect guests to the ocean, rainforest and galaxies inspiring a deep connection with Nature.

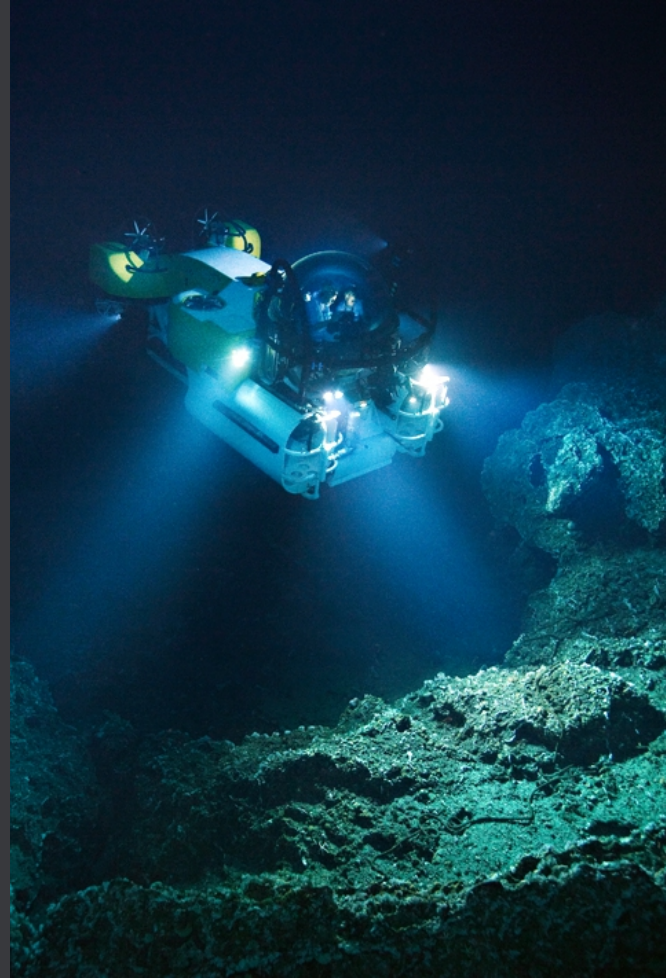

Each private island estate will have its own purpose and community, hosting tailor-made retreats based on self-mastery and social contribution.

Challenger Island, dedicated to deep sea exploration, marine research and conservation, led by world-renowned scientists and experts.

YouthTopia, dedicated to supporting the journeys of young change makers, led by Melati and Isabel Wijsen, creators of the Bye Bye Plastic Bags Campaign.

Einstein Island, dedicated to supporting innovators who are creating products,
services and projects that have the potential to solve major global issues.

Be Voyageur, dedicated to hosting executives seeking to create businesses that change the world.

Shaman Island, dedicated to preserving ancient wisdom, knowledge and practices.

“Someday, after mastering the winds, the waves,
the tides and gravity, we shall harness for God the energies of love,
and then, for a second time in the history of the world,
man will have discovered fire.

Pierre Teilhard de Chardin
