2020 Global Go To Think Tank Index Report

Abstract

Background on the Think Tanks and Civil Societies Program The Think Tanks and Civil Societies Program (TTCSP) of the Lauder Institute at the University of Pennsylvania conducts research on the role policy institutes play in governments and civil societies around the world. Often referred to as the “think tanks’ think tank,” TTCSP examines the evolving role and character of public policy research organizations. Over the last 30 years, TTCSP has developed and led a series of global initiatives that have helped bridge the gap between knowledge and policy in critical policy areas such as international peace and security, globalization and governance, international economics, environmental issues, information and society, poverty alleviation and healthcare and global health. These international collaborative efforts are designed to establish regional and international networks of policy institutes and communities that improve policymaking while strengthening democratic institutions and civil societies around the world. TTCSP works with leading scholars and practitioners from think tanks and universities in a variety of collaborative efforts and programs and produces the annual Global Go To Think Tank Index that ranks the world’s leading think tanks in a variety of categories. This is achieved with the help of a panel of over 1,796 peer institutions and experts from the print and electronic media, academia, public and private donor institutions and governments around the world. We have strong relationships with leading think tanks around the world, and our annual think Tank Index is used by academics, journalists, donors and the public to locate and connect with the leading centers of public policy research around the world. Our goal is to increase the profile and performance of think tanks and raise the public awareness of the important role think tanks play in governments and civil societies around the globe. Since its inception in 1989, TTCSP has focused on collecting data and conducting research on think tank trends and the role think tanks play as civil society actors in the policymaking process. In 2006, TTCSP developed and launched a pilot project named the global index of think tanks, designed to identify and recognize centers of excellence in all the major areas of public policy research and in every region of the world. To date, TTCSP has provided technical assistance and capacity building programs in 85 countries. We are now working to create regional and global networks of think tanks in an effort to facilitate collaboration and the production of a modest yet achievable set of global public goods. Our goal is to create lasting institutional and statelevel partnerships by engaging and mobilizing think tanks that have demonstrated their ability to produce high quality policy research and shape popular and elite opinions and actions for the public good.

Acknowledgements

The 2020 edition of the Global Go To Think Tank Index Report marks the 15th edition of the report. I want to thank all the interns, peers and experts who have helped make the report a valuable resource for policymakers, policy-oriented civil society organizations and the public. The Go To Index is now used to identify and recognize centers of excellence in policy research, forge knowledge and policy partnerships and create a global think tank village. I want to express my deep appreciation to the 3,974 plus university faculty and administrators, journalists, policymakers, think tank scholars and executives, and donors from every region of the world that participated in the 2020 Global Go To Think Tank Index (GGTTI). I would like to thank the functional area and regional specialists who served as expert panelists and provided valuable insights and assistance as I compiled the report. Thank you also to my research interns Sabrina Ochoa and Valeria Zeballos Doubinko and their respective teams for their help in compiling and analyzing the data for the 2020 Index. A special note of appreciation for Alisa Wadsworth for her assistance with the final editing, fact checking and formatting of the 2020 edition of the report. In conjunction with the regional research intern team, they put in long hours to help improve the quality and appearance of the Index. Finally, I want to thank the more than 300 hosts, planning-committee members and partner institutions around the world that have agreed to host think tank events in approximately 130 cities, hosted by 152 organizations and over 600 partners in 125 cities involving thousands of individuals in a discussion of Why Think Tanks Matter. Once again, thanks to the global community of think tanks over 11,000 strong for helping TTCSP highlight the important role think tanks play in civil societies and governments around the world. Last but not least, I want to thank Ambassador Ronald S. Lauder and Martine Haas, Director of the Joseph H. Lauder Institute, for their support and for the dedicated group of TTCSP research interns who help make the work of the Think Tanks and Civil Societies Program possible.

Introduction

The 2020 Global Go To Think Tank Index (GGTTI) marks the fifteenth year of continued efforts by the Think Tanks and Civil Societies Program (TTCSP) at the University of Pennsylvania to acknowledge the important contributions and emerging global trends of think tanks worldwide. Our initial effort to generate a ranking of the world's leading think tanks in 2006 was a response to a series of requests from donors, government officials, journalists and scholars to produce regional and international rankings of the world's preeminent think tanks. Since its inception, our ongoing objective for the GGTTI report is to gain an understanding of the role think tanks play in governments and civil societies. Using this knowledge, we hope to assist in improving the capacity and performance of think tanks around the world.

Since 2006, the ranking process has been refined and streamlined, and the number and scope of the institutions and individuals involved has steadily grown. The process, as in past years, relies on a shared definition of public policy research and analysis and engagement organizations, a detailed set of selection criteria and an increasingly open and transparent nomination and selection process. As part of the nominations process, all 11,175 think tanks catalogued in TTCSP's Global Think Tank Database were contacted and encouraged to participate in the nomination and ranking process. Over 44,992 journalists, policymakers, public and private donors, and functional and regional area specialists on the TTCSP listserv were invited to participate and over 3,974 fully or partially completed the nomination and ranking surveys. Finally, a group of peers and experts was asked to help rank and review the public policy research Centers of Excellence for 2020.

To refine and validate the generated ranking lists, TTCSP assembled Expert Panels comprised of hundreds of members from a wide variety of backgrounds and disciplines. Additionally, new media—the website and social media presence—helped us communicate and disseminate information about criteria for this year's Index to a wider audience (please see “Methodology and Timeline” for the complete set of nomination and ranking criteria and “Appendices” for a detailed explication of the ranking process). Given the rigor and scope of the nomination and selection processes, the rankings produced thus far have been described as the insider's guide to the global marketplace of ideas.

As a final note, we would like to remind you that the data collection, research and analysis for this project, as in previous years, were conducted without the benefit of field research, a budget or staff. Despite these limitations, we are confident in the quality and integrity of the findings given the number of peers and experts from around the world who have taken the time to participate in the process.

We are confident that the peer nomination and selection process, as well as the work of the international Expert Panels, have enabled us to create the most authoritative list of high-performance think tanks in the world. Still, efforts to streamline and perfect the process are ongoing. We are continually seeking ways to enhance the process and welcome your comments and suggestions. We further encourage you to provide the names and contact information for prospective expert panelists for functional and regional areas covered by the Index. Thank you for your continued support of TTCSP and of the annual Global Go To Think Tank Index. We hope our efforts to highlight the important contributions and emerging global trends of think tanks worldwide will foster insightful discussions and debates on the present and future roles of these vital institutions.

Global Go To Think Tank Index and Think Tanks and Civil Societies Program by the Numbers

- On the University of Pennsylvania Scholarly Commons site alone, TTCSP's 2019 Global Think Tank Index Report has been downloaded 392,990 times from January to November 2020. It is currently the number-one downloaded research paper on the site.
- Over 73,000 individuals and institutions are on the full TTCSP listserv, following the Go To Indexing Process and its findings, and 44,992 individuals and institutions were invited to complete the Global Go To Think Tank Index Survey.

2020 Global Go To Index Survey Sample Size	
Region	Number of Invited Participants
Western Europe	5835

60 Questions
41.1%: Average Partial Completion Rate
58.9%: Average Full Completion Rate
16.3 Minutes: Average Time Taken

- Thousands of think tank scholars and executives have participated in the national, global, and regional think tank summits organized by TTCSP in partnership with think tanks around the world.

What is a Think Tank?

Think tanks are public policy research analysis and engagement organizations that generate policy-oriented research, analysis and advice on domestic and international issues, thereby enabling policymakers and the public to make informed decisions about public policy. Think tanks may be affiliated or independent institutions that are structured as permanent bodies, not ad-hoc commissions. These institutions often act as a bridge between the academic and policymaking communities and between states and civil society, serving in the public interest as an independent voice that translates applied and basic research into a language that is understandable, reliable and accessible for policymakers and the public (*Think Tanks and Policy Advice in the US*, Routledge 2007 and in *The Fifth Estate: Think Tanks, Public Policy, and Governance*, Brookings Institution Press 2016).

To bridge these conceptual problems and create a typology that takes into consideration the comparative differences in political systems and civil societies, we have developed several categories for think tanks. Think tanks may perform many roles in their host societies; there is, in fact, wide variation among think tanks in the work they do and the extent to which they do it. Over the last 90 years, several distinct organizational forms of think tanks have emerged that differentiate themselves in terms of their operating styles, patterns of recruitment and aspirations to academic standards of objectivity and completeness in research. It should be noted that alternate typologies of think tanks have been offered by other analysts.² In the global context, most think tanks tend to fall into the broad categories outlined below.

² See Weaver and McGann, *Think Tanks and Civil Societies: Catalysts for Ideas and Action* (2000), Transaction Publishers; and McGann, *The Fifth Estate: Think Tanks, Public Policy, and Governance* (2016), Brookings Institution Press, for a discussion of the origins and competing definitions of think tanks in the U.S. and around the world.

Figure 1: Categories of Think Tank Affiliations

CATEGORY	DEFINITION
AUTONOMOUS AND INDEPENDENT	Significant independence from any one interest group or donor, and autonomous in its operation and funding from government.
QUASI-INDEPENDENT	Autonomous from government but controlled by an interest group, donor or contracting agency that provides most of the funding and has significant influence over operations of the think tank.
GOVERNMENT-AFFILIATED	A part of the formal structure of government.
QUASI-GOVERNMENTAL	Funded exclusively by government grants and contracts but not a part of the formal structure of government.
UNIVERSITY-AFFILIATED ³	A policy research center at a university.
POLITICAL-PARTY AFFILIATED	Formally affiliated with a political party.
CORPORATE (FOR-PROFIT)	A for-profit public policy research organization, affiliated with a corporation or merely operating on a for-profit basis.

³Another typology distinguishes between three types of think tanks: “universities without students,” contract researchers and advocacy tanks. Weaver (1989).

North America and Europe

- There are 2,397 think tanks in North America (Mexico, Canada, and the United States) of which 2,203 are in the United States. There are 2,932 think tanks in Europe.
- Over 47 percent of all think tanks are in North America and Europe, an increase from last year.
- The number of think tanks in the United States has more than doubled since 1980.
- The end of Post-World War II consensus and challenge to the welfare state contributed to the growth of think tanks on the left and the right of the political spectrum.
- Most of the think tanks that have come into existence in the United States since the 1970s are specialized for a particular regional or functional area.
- Almost 8 percent of US-based think tanks are located in Washington, DC.
- The rate of establishment of think tanks has declined over the last 12 years in the United States and Europe.

Asia, Latin America, Africa, and the Middle East

- Asia, Latin America, Africa, the Middle East and North Africa continue to see an expansion in the number and type of think tanks established.
- Asia has experienced a dramatic growth in think tanks since the mid-2000s.
- Many think tanks in these regions continue to be dependent on government funding along with gifts, grants and contracts from international public and private donors.
- University- or government-affiliated or funded think tanks remain the dominant model for think tanks in these regions.
- There is increasing diversity among think tanks in these regions with independent, political party affiliated and corporate or business sector think tanks that are being created with greater frequency.
- To diversify their funding base, think tanks have targeted businesses and wealthy individuals to support their core operations and programs.

Reasons for the Growth of Think Tanks in the Twentieth and Twenty-First Centuries

- Information and technological revolution.
- End of national governments' monopoly on information.
- Increasing complexity and technical nature of policy problems.
- Increasing size of government.
- Crisis of confidence in governments and elected officials.
- Globalization and the growth of state and non-state actors.
- Need for timely and concise information and analysis that is "in the right form, in the right hands, at the right time."

Reasons for the Recent Decline in Number of Think Tanks Established Worldwide

- Failure to understand and respond to non-traditional sources of competition.
- Failure to adopt new technologies and marketing and communications strategies.
- Political and regulatory environment that is increasingly hostile to think tanks, experts and policy advice.
- Decreasing funding for policy research by public and private donors.
- Public and private donor tendency toward short-term, project-specific funding instead of investing in ideas and institutions.
- Underdeveloped institutional capacity and the inability to adapt to change.
- Increased competition from advocacy organizations, for-profit consulting firms, law firms and 24/7 electronic media.
- Institutions having served their purpose and discontinued their operations.

When I helped organize the first international meeting of think tanks, one of the major debates at the meeting was the contention that the term "think tank" does not travel well across borders and cultures. That is clearly no longer the case, as the term is now widely accepted around the globe to describe public-policy research analysis and engagement organizations that generate policy-oriented research, analysis, and advice on domestic and international issues, which enable policymakers and the public to make informed decisions about public policy issues.

And, increasingly, think tanks are a global phenomenon because they play a critical role for governments and civil societies around the world by acting as bridges between knowledge (academia) and power (politicians and policymakers).

Governments and individual policymakers, throughout the developed and developing world, face the common problem of bringing expert knowledge to bear in government decision-making. Policymakers need understandable, reliable, accessible and useful information about the societies they govern. They also need to know how current policies are working, as well as how to set out possible alternatives and their likely costs and consequences. This expanding need has fostered the growth of independent public policy research organization: the think tank community, as we know it.

Think tanks have increased in number; the scope and impact of their work have also expanded dramatically. Still, the potential of think tanks to support and sustain democratic governments and civil societies around the world is far from exhausted. The challenge for the new millennium is to harness the vast reservoir of knowledge, information and associational energy that exist in public policy research organizations so that it supports self-sustaining economic, social and political progress in every region of the world for public good.

Part of the goal of this report is to raise some of the critical threats and opportunities that face the think tank community globally. These threats are best expressed by what I call the “four mores”⁴:

- More Issues
- More Actors
- More Competition
- More Conflict

These threats create a set of challenges that confront all think tanks:

- Competitive challenges
- Resource challenges
- Technological challenges

To effectively respond to the threats and opportunities posed by this new and challenging environment, think tanks need to focus on the “four M’s”:

- Mission
- Market
- Manpower
- Money

In a global marketplace of ideas, think tanks need to develop national, regional and global partnerships while creating new and innovative platforms to deliver their products and services to an ever-expanding audience of citizens, policymakers and businesses around the world.

⁴

McGann, 2007

2020 Trends and Transitions in Think Tanks and Policy Advice

TTCSP is dedicated to understanding the key trends and challenges facing think tanks around the world. All our research, publications, and regional and global think tank summits are focused on the organizational challenges confronting the think tank community and the policy challenges facing think tanks, policymakers and the public. This issue, in addition to highlighting the impact of Artificial Intelligence (AI) and emerging technologies on think tanks, we have highlighted the impact of COVID-19 on think tanks and the response of the think tank community to the pandemic. This is followed by a new list that TTCSP is introducing to the 2020 Global Go To Think Tank Index: “2020 Best AI Policy and Strategy Think Tanks” and “2020 Best Policy and Institutional Response to COVID-19.”

James G. McGann with special thanks to Alisa Wadsworth and Varsha Shankar for assistance in writing and preparing these articles.

Think Tanks and Civil Societies Program

Lauder Institute

University of Pennsylvania

The Impact of COVID-19 on Think Tanks by James G. McGann, PhD.

From April through July 2020, TTCSP hosted a series of virtual Global Think Tank Town Halls to Save Lives and Livelihoods to respond rapidly and proactively as a global think tank community to the novel coronavirus (COVID-19). The pandemic has proven to be an unprecedented threat to the health, economic well-being, and general livelihood of people all over the globe. TTCSP has recognized the value that the think tank community can provide to policymakers and the public as they work towards mitigating the consequences of COVID-19, and the Global Think Tank Town Halls served as a space for the community to convene and mobilize. 1226 think tank executives, scholars and policymakers from over 540 institutions in over 87 countries met over the course of the three Town Halls to produce actionable responses and solutions to the devastating consequences of the virus.

The first Global Think Tank Town Hall made note that think tanks must become stronger, smarter and faster in response to COVID-19 and create effective policy recommendations to support vulnerable and impacted sectors around the world. The second Global Think Tank Town Hall saw the creation of five Working Groups that focused on 1) the public health crisis; 2) preparing national and international strategies for economic recovery and revitalization; 3) identifying innovative and inclusive public and private intervention strategies to help vulnerable groups; 4) fostering international cooperation by creating rapid, responsive and resilient systems to respond to future crises; and 5) new operating models for think tanks – research, communications and funding.

The third and final Global Think Tank Town Hall saw each Working Group present their recommendations and key proposals. Each Working Group conducted their analyses and formulated strategic and actionable recommendations within 45 days, reflecting the ability of the think tank community to convene from all corners of the world and produce tangible results in a short span of time. Below are the key recommendations from each Working Group on the five key issues analyzed.

Public Health Crisis

Working Group 1 analyzed the impact of increased globalization, which has not only integrated nations and economies but has also led to the internationalization of infectious diseases. One focal point is knowledge and information sharing. The Working Group discussed the importance of collecting consistent, reliable and disaggregated data; investing in collaboration, innovation and distribution; and streamlining the regulatory environment and reforming legal regimes to allow innovations.

The Working Group additionally gave recommendations for best practices in managing the public health crisis, which included sharing experiences and simulation models to inform policy. They also discussed the need for research-based solutions and policies, which think tanks can play a role in: the think tank community has the potential to necessitate the augmentation of state capacity, during a pandemic and otherwise. The importance of accelerating progress towards universal health coverage was emphasized, as was the need for the equitable distribution of vaccines, medicines and capabilities.

Preparing National and International Strategies

Working Group 2 focused on targeting sustainable and broader-based economic recovery, focusing on shaping free-market policies that empower a circular economy and science-based target initiative tools. The Working Group laid out a handful of basic principles that governments should adhere to in order to rebuild national and global economies: these included prioritizing green recovery, international cooperation, democracy and inclusive free markets, market-driven responses to infectious diseases, and dynamic and flexible policies.

The Working Group also noted the importance of prioritizing digitization moving forward. Think tanks can be pivotal in encouraging governments to promote digital transformation and inclusion, as well as support the international community in accelerating talks to reduce the risk of privacy invasion and cyber threats with greater technological regulation. Finally, they highlighted the importance of shaping the informal economy into an agent of recovery by focusing on three key pillars: building updated databases, making formal employment the easiest and most desired solution, and adopting a comprehensive reform approach to the informal economy. Think tanks can play a key role in shaping policy in this direction.

Innovative and Inclusive Public and Private Strategies to Help Vulnerable Groups

Working Group 3 focused on five particular vulnerable groups: children and youth, the elderly, women in vulnerable conditions, migrants and racial and ethnic minorities. Regarding children and youth, key recommendations include monitoring the functioning of institutions responsible for the protection of children, ensuring working parents have sufficient time to care for children and equitable access to safe medical services to all families and youth. For the elderly, it must be ensured that WHO and CDC guidelines for long-term care facilities are effectively implemented, as well as access to phone and video call technology for those in long-term care facilities that require sufficient funding. Regarding women in vulnerable conditions, think tanks should advocate for the development of economic empowerment tools so women were better equipped to be financially independent; furthermore, think tanks can help shape policy that creates better awareness regarding what constitutes violence against women.

For migrants, it is imperative that states implement protective measures to ensure migrants' rights to personal security and access to basic rights such as food and healthcare; furthermore, the Working Group recommends eliminating custodial detention methods. Finally, for racial and ethnic minorities, recommended policies include localizing and diversifying service and supply chains to support minority-owned businesses; assuring basic items of consumption in minority neighborhoods; improved local government to support housing and employment stability; and prioritizing public health programming with stronger consideration of the social determinants of health.

Fostering International Cooperation: Creating Rapid, Responsive and Resilient Systems to Respond to Future Crisis

Working Group 4 looked at how to better shape resilient policies and systems to respond not only to COVID-19 but future crises by focusing on strategies that can be adopted at the local, regional and global levels. On the local level, technology should be used to effectively control and distribute resources; direct assistance via managing commercial and supply chains, financial relief, and tax exemptions is vital; and unified programs to administer tests throughout the pandemic should be developed.

Regionally, efforts should focus on strengthening regional multilateral organizations and coordinating initiatives and consensual operational protocols between countries. Globally, the Working Group proposes that the international community should prioritize strengthening

global multilateral organizations; creating new multilateral cooperation and crisis committees; sharing information systems and technologies for pandemic detection and control; internationally coordinating fiscal and monetary policies; and finally, creating a new sustainability and debt financing framework for low-income countries.

Being Fit for an Uncertain Future: New Operating Models for Think Tanks — Research, Communications and Funding

Working Group 5 focused on four key areas in which think tanks can strengthen their operating models moving forward: communications, events, fundraising and research priorities. Regarding communication, think tanks should work in niche intersections of COVID-19 and specific issues in which think tanks have expertise, focus on highly visible communications and stakeholder outreach initiatives, and invest in new and diverse online formats of communications. Think tanks should also reimagine events in the digital sphere, recognizing the potential for widening one's audience base while reducing the environmental impact of events.

Moving forward with fundraising, the Working Group says that think tanks should engage with the private sector as partners in research projects, rather than solely as donors, and think tanks should build partnerships with other think tanks. Think tanks should also redirect and widen research priorities so as to break thematic silos culture and find new policy intersections, as well as develop thematic partnerships with other think tanks focused on long-term research projects.

The Future of Think Tanks and Policy Advice⁵ by James G. McGann, PhD.

Over the last 10 years, I have been examining the forces that have transformed the policy environment in which think tanks operate and redefined the strategy and structure of many think tanks. These forces are primarily driven by changes in politics, how think tanks are funded and advances in technology and communications. Over the last decade, there are five key trends that flow from the fourth industrial revolution that will transform all of our jobs and lives over the next 10 years. These forces are also driving the digital and political disruptions sweeping across the globe:

- The dramatic increase in the rate of technological change;
- The disruptive and transformative power of social media, social networks, artificial intelligence and big data;
- The increased velocity of information and policy flows;
- Global information tsunamis; and
- Information interdependence and the rise of information warfare.

Human and digital networks that are constantly being enhanced by new technologies are increasing both the volume and velocity of information flows around the world. These new realities are making it possible to manage and manipulate massive amounts of data which are disrupting business, politics and public policy. Henry Kissinger famously said that being a policy maker is like being at the end of a firehose, and today, we are all at the end of a firehose. This never-ending flood of competing ideas and information makes it difficult to process all the different ideas, options and alternatives. How do you determine which product or candidate is the right one for you? It is no surprise in this environment that the traditional products, ideas and institutions are overlooked for the outrageous and outlandish. These forces have created a crowded and competitive global marketplace of ideas and policy advice that poses new and very challenging strategic and operational challenges for think tanks.

In the last four years, the trends outlined above have been compounded by two new forces that have intensified and accelerated the winds of change and are likely to transform think tanks, policy advice and public policy:

The efforts to discredit and undermine experts and think tanks, and the COVID-19 pandemic.

It is precisely during these turbulent times when experts and their advice are being undermined and significant policy and technology disruptions are calling in question the value and efficacy of policy advice that I felt it was critical that we pause and reflect on the future of think tanks and policy advice. Within this context, I believed it was essential that we launch a major national and global initiative to explore the future of think tanks and policy advice in the US and in a host of countries in every region of the world. The two books, titled *The Future of Think Tanks and Policy Advice in the United States* and *The Future of Think Tanks Around the World*, consist of thought pieces from 64 chief executives of top think tanks from 31 countries. They discuss the technological, political, and policy environment that is currently and will continue to shape the future of think tanks and policy advice. Topics discussed include: the impact of technology, big

⁵ This piece is an adapted excerpt from two upcoming books by James G McGann, “The Future of Think Tanks and Policy Advice in the United States” and “The Future of Think Tanks and Policy Advice Around the World” (Palgrave Macmillan, 2021).

data and artificial intelligence, competition from advocacy groups and public relations firms, increased polarization of politics, major changes in how think tanks are funded and the impact of the COVID-19 pandemic on think tank operations. As I have said many times, think tanks must be smarter, better, faster and more agile, innovative and tech savvy if they are to survive in what is now a global marketplace of ideas and policy advice. The essays in this two-volume set clearly demonstrate that many think tanks around the world are meeting these new and daunting challenges.

Total Number of Authors in the U.S. Book	24
Total Number of Authors in the Global Book	40
Total Number of Authors	64

Selected Quotes on the State of Think Tanks and Policy Advice

“The government and the general public alike are **relying on think tanks to inform their thinking, especially in an age of increased disinformation**, an active assault on truth, and democratic decay.” —**John Allen**, Brookings Institution

“...nations have become increasingly ‘platformised’ — relying extensively on flexible social, political, and economic arrangements that technology enables — **think tanks need to morph into far more agile institutions.**” —**Samir Saran**, Observer Research Foundation

“Think tanks must have these **broader, increasingly empowered audiences** in mind when crafting their theories of change.” —**Sarah Wartell**, Urban Institute

“The **processes of digital transformation** should also be considered within [think tanks], since innovation will inject them with the modernity that is required in contemporary times.” —**Elaine Ford**, Democrazia Digital D&D

“We [have] to make our content more accessible and change the kind of issues we’re looking at...Of course, it goes without saying that **we cannot compromise our quality or our objectivity** in reaching these objectives.” —**Adam Posen**, Peterson Institute for International Economics (PIIE)

“...the **role of think tanks in Africa is likely to become even more important** in the future, taking into account....a number of **significant challenges and opportunities**, including population growth, urbanization, technological developments, the knowledge economy, and perhaps the most significant: climate change.” —**Vasu Gounden & Cedric de Coning**, ACCORD

“As think tanks look to the future, we must be **committed to both preservation and progress** – maintaining the strengths of original research and independence while developing new ways to meet the challenges...and maintaining relevance in an ever-changing world.” —**Kay Coles James**, Heritage Foundation

“...dependence on **project-based funding** and lack of access to core financing **limits the long-term sustainability of think tanks** in the Western Balkans and thwarts their prospects for engaging in more complex and longer-term research endeavors.” —**Milena Lazarevic**, European Policy Centre

What Policymakers Think About The Future of Think Tanks and Policy Advice

“Expertise has been the subject of abuse in recent years, with opponents ranging from conspiracy-theorists to populist leaders all seeking to denigrate 'elite' academics and experts as out of touch. Think-tanks have been a particular victim of this toxic discourse. Compiling the views of 64 current and former presidents of think tanks around the world, the book provides a fascinating wealth of information, posing probing questions about the place of think-tanks today and tomorrow.” **Dr Shashi Tharoor, M.P., Member of Parliament for Thiruvananthapuram Lok Sabha, Chairman of the Parliamentary Standing Committee on Information Technology, Chairman, All-India Professionals' Congress, India**

“Dr. McGann has been studying the think tank industry for decades and has witnessed endless examples of successful as well as failed institutions; his assessment is solid, convincing, and exceptional in its breath and depth. This is his bible.” **Luis Rubio, Chairman, Mexican Council on Foreign Relations, COMEXI**

“The forces of disruption that have battered our collective faith in expertise and independent analysis are a call to action for think tanks to better navigate this increasingly volatile landscape. This book offers valuable lessons for think tank leaders who hope to reach and inform decision-makers in order to better address the significant challenges impacting lives in all parts of our world.” **Penny Pritzker, Former US Secretary of Commerce**

“At this global inflection point, “The Future of Think Tanks” provides a ground-breaking and thought-provoking analysis of an increasingly influential community and the challenges and opportunities it confronts. Jim McGann and the authors he has assembled provide timely insights into a little-understood but hugely significant world of scholars and actors who help us shape a better world.” **General James L. Jones, Former United States National Security Advisor and Former Supreme Allied Commander Europe**

I want to thank my Research Intern and Project Lead for The Future of Think Tanks and Policy Advice project, Varsha Shankar, for her help in preparing this essay.

Overview of Changes and Enhancements to the Global Go To Think Tanks Index

Each year, we attempt to respond systematically to comments and suggestions to improve the nomination and ranking process for the Global Go To Think Tank Index (GGTTI). Since the inaugural report in 2006, the nomination and selection processes have changed significantly. While TTCSP continually seeks to improve the nomination and selection process, several things should be kept in mind. First, although we do our best to catch and eliminate as many mistakes as possible, we do not claim that the annual rankings are error-free. As with many ranking systems, the GGTTI has its fair share of limitations, which we continuously seek to overcome. Second, critiques highlighting the rankings' comprehensiveness fail to understand our commitment to studying the contributions and impact of think tanks worldwide. The Index's aim is to produce an inclusive and far-reaching report of international think tanks. Moreover, we hope to extend the Index to include even more think tanks around the world.

Recent Years' Changes and Enhancements

TTCSP is committed to increasing the quality and representativeness of the Index every year we conduct the survey. Since 2010, hundreds of expert panelists have participated in an evaluation of the ranking criteria and nominations and indexing processes. As a result, the Index has undergone several major changes designed to limit bias, expand the rankings' representativeness, and improve the overall quality and integrity of the nomination process. The following modifications have been made to the Index over the last several years:

2010

- In 2010, a ranking list for think tanks with an annual budget of less than five million U.S. dollars was created. This category helps to recognize the work of smaller think tanks that produce influential research but might otherwise be edged out in the rankings by think tanks with larger budgets and greater manpower.
- American think tanks were removed from the global ranking to improve the visibility of global organizations and recognize the inherent advantages of American think tanks.
- The methodology was revamped to encompass an open nominations process in which all 6,480 think tanks identified by TTCSP at that time were invited to submit nominations. This replaced a system where the Expert Panels developed the initial slate of institutions. The change dramatically increased the levels of participation and greatly improved the quality and representativeness of nominated institutions.
- An outreach effort was launched in Africa, Asia, Latin America and the Middle East and North Africa (MENA) to improve the Index's inclusivity.

2011

- The Latin America category was restructured into two categories: "Top Think Tanks in Mexico, Canada, and the Caribbean" and "Top Think Tanks in Central and South America."

2012

- The Latin America categories were further refined into “Top Think Tanks in Mexico and Canada” and “Top Think Tanks in Central and South America.”
- The Asia category underwent revisions to prevent the group’s domination by China, India, Japan, and the Republic of Korea. The Asia section was divided into two categories: “Top Think Tanks in China, India, Japan, and the Republic of Korea” and “Top Think Tanks in Asia (excluding China, India, Japan, and the Republic of Korea).”
- Five new special achievement categories were created: “Best Advocacy Campaign,” “Best Policy Produced by a Think Tank 2011-2012,” “Best For-Profit Think Tanks,” “Top Energy and Resource Policy Think Tank,” and “Top Education Policy Think Tanks.” These categories recognize both special achievements and excellence in particular areas of study. This expansion aimed to better recognize the diverse range of issues think tanks address and the new organizational types that have emerged over the past five years.
- The “Best New Think Tanks” category examined organizations founded over the past 24 months instead of the past 18.

2013

- To increase inclusivity, the Asia categories were further subdivided into three categories: “Top Think Tanks in Asia and the Pacific (Excluding China, India, Japan, and the Republic of Korea),” “Top Think Tanks in China, India, Japan, and the Republic of Korea,” and “Top Think Tanks in Central Asia.”
- The “Top Security and International Affairs Think Tanks” category was divided into “Top Defense and National Security Think Tanks” and “Top Foreign Policy and International Affairs Think Tanks.”
- Eight new special achievement categories were added: “Think Tank to Watch,” “Best Use of Social Networks,” “Best Institutional Collaboration Involving Two or More Think Tanks,” “Best Think Tank Network,” “Best Think Tank Conference,” “Best Managed Think Tank,” “Best New Idea or Paradigm Developed by a Think Tank” and “Best Transdisciplinary Research Program at a Think Tank.”

2014

- In order to amend anomalies present in the 2013 Global Go To Index, some of the regional categories were reorganized according to countries geographic location. The Central Asia category underwent revisions and will consist only of think tanks from Afghanistan, Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Turkish think tanks will remain in the Middle East and North Africa category, as will Cypriot ones, despite Cyprus’ status as an EU member state. Think tanks from Bangladesh, Bhutan, Nepal, and Pakistan will be ranked in the Asia and the Pacific category. The Central and Eastern Europe category will include Russian think tanks and think tanks from those countries that lie between Turkey and Russia in the east and Sweden, Germany, Austria, and Italy in the west.
- The “Top Health Policy Think Tanks” category was subdivided into the “Top Global Health Policy Think Tanks” and “Top Domestic Health Policy Think Tanks” categories so as to better reflect the fact that there are two distinct areas of focus in the field of health policy.

2015

- Three new categories were added to the 2015 Global Go To Index: “Best Regional Studies Policy Research Think Tank (University Affiliated)”, “Best Regional Studies Policy Research Center (Free Standing, Not University Affiliated)” and “Think Tank with the Best Practices (Policies and Procedures) to Assure the Quality, Independence and Integrity of its Policy Research.”

2016

- In an effort to simplify and streamline the nominations and rankings process, we did not require those institutions that were not ranked in the 2015 Global Go To Index to be re-nominated in 2016 nominations phase of the Global Go To Indexing process.

2017

- Two new categories were added to the 2017 Global Go To Think Tank Index: “Water Security” and “Food Security”.

2018

- An audit has been conducted on our Global Think Tank Database that involved comparative analysis of the data and fact- and cross-checking the data. Updated numbers are presented in the 2018 Go To Index Report.
- A section was added to each section of the survey that allowed respondents to report gross omissions or errors from previous years that required corrections or editing. Over 650 comments and suggestions were submitted, and we have done our best to correct them.

2019

- A new category was added to the 2019 Global Go To Think Tank Index: “Think Tank On Cutting Edge of Artificial Intelligence Research”.
- A change to the 2019 Global Go To Think Tank Index rankings is that any think tank that has been ranked as the top think tank (#1) in a category for 3 consecutive years will be recognized as a Center of Excellence and will not be included in the rankings for that category for the next 3 years. It will be recognized as a Center of Excellence for achieving this level of distinction as a Think Tank Center of Excellence.

2020

- A new assessment was added to evaluate think tanks’ responses to the COVID-19 pandemic. The 2020 report will include a ranking category concerning the best adaptation of programming and communication to this new environment.
- In addition, 105 multilingual summer research Interns helped conduct a systematic update of the TTCSP think tanks database which has greatly enhanced the accuracy and quality of the listings in the database. Finally, a thorough review was conducted of all the definitions for the Global Go To Think Tank Index categories.

2020 Process and Methodology

Each year, our best efforts have gone into generating a rigorous, inclusive and objective process. However, we recognize the impossibility of entirely ridding the Index from bias. Inevitably, personal, ideological, disciplinary and regional biases of those consulted throughout the process may have influenced the rankings. While some have suggested that we move to a small group or panel of experts and journalists to make the selections, we are unwavering in our commitment to an open and democratic process. Given the safeguards in place—the transparent process, the provisions set by the detailed nomination and selection criteria and the annually increasing participation of think tanks and experts from every region of the world—we are confident in the quality and integrity of the Index. Additionally, with the growing involvement of the expert panelists, the nomination and ranking process has also been dramatically improved. Together, we believe these measures insulate the nomination and selection process from any significant charges of bias and misrepresentation.

We would like to underscore that the GGTTI is but one measure of a think tank's performance and impact and has been designed for use in conjunction with other metrics to help identify and evaluate public policy research organizations around the world. An organization's inclusion within the Index does not indicate a seal of approval or endorsement for the institution, its publications, or its programs by TTCSP. Conversely, an organization's exclusion from the rankings does not necessarily indicate poor quality, effectiveness, or performance. There are 11,175 think tanks around the world completing exceptional work to help bridge the gap between knowledge and policy. This report is only one effort to highlight some of the world's leading think tanks.

Methodology and Timeline

Before beginning the 2020 nomination and selection process, the team conducted extensive research to update and verify TTCSP's Global Think Tank Database. Through this process, many additional think tanks were identified for possible inclusion in this year's study. A month in advance of the 2020 nomination and selection process launch, a letter announcing the commencement of the 2020 GGTTI was sent to individuals and organizations in our database. Think tanks were asked to make recommendations for improving the nomination and selection process, in addition to potential Expert Panel nominees. A letter requesting evaluations of the efficacy and validity of the 2019 Rankings criteria, and nomination and selection process, was also sent to expert panelists from previous years.

Timeline of the Nomination and Ranking Process

Call for Expert Panel Members and Update of TTCSP Think Tank Database: April—August 2020

In preparation for the 2020 Global Go To Think Tank Indexing process, a call for nominations was issued for qualified individuals to serve on the Regional, Functional and Special Areas of Distinction Panels. In addition, we asked for comments, suggestions and recommendations for how we might improve the Index. In addition, 70 summer research interns help update TTCSP Global Think Tank Database to make sure all known think tanks are included in the Survey.

Round I: Nominations, September—October 2020

A call for Nominations was sent to over 8,100 think tanks and approximately 12,800 journalists, public and private donors, and policymakers from around the world. These nominations were tabulated and institutes with 10 or more nominations were included in the next step of the 2020 Think Tank Indexing process. All the top-ranked think tanks from 2019 were automatically included in the 2020 ranking ballot.

Round II: Peer and Expert Rankings, October 2020

Think tanks with 10 or more nominations were placed in an electronic ranking survey. A letter announcing the second round was emailed to all the think tanks, journalists, public and private donors, and policymaker groups who agreed to participate in the process. The rankings were tabulated, and the list of finalists was generated for the Expert Panel to review and make final selections. Regional and Functional Expert Panels were used for every category. These specialists were consulted to help assure the quality and accuracy of the nominations before they were placed on the final rankings survey.

Round III: Expert Panel Selects 2020 Go To Think Tanks, November—December 2020

The members of the Expert Panel received information packets by email to facilitate the final selection process. Individuals who served on last year's Expert Panel as well as those who were nominated this year were invited to serve on the 2020 Expert Panel. Experts from every region and functional area were represented on the Expert Panel. Panelists submitted their rankings and recommendations during the month December 2020.

2020 Global Go To Think Tank Report Launch: The 2020 Global Go-To Think Tank Rankings will be released in New York, Washington D.C. and over 100 cities around the world on January 30, 2021.

2020 Categorical Definitions

By Region

Top Think Tanks in Sub-Saharan Africa: This category is dedicated to the leading institutions in the region south of the Sahara Desert. The category is used to contrast the countries that are included in the Middle East and North Africa (MENA) category. Sudan, although geographically located south of the Sahara Desert, is not considered a Sub-Saharan country. The think tanks in this category excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in the relevant country and region.

Top Think Tanks in Central and South America: This category is dedicated to the leading institutions in the Central and Southern part of the American continent, including the Caribbean states. The definition excludes Canada, Mexico and the United States. The think tanks in this category excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in the relevant country and region.

Top Think Tanks in the United States: This category is dedicated to the leading institutions in the United States. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in the United States.

Top Think Tanks in Asia: This category is dedicated to the leading institutions in Central Asia and the Caucasus region, namely Afghanistan, Armenia, Azerbaijan, Georgia, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Although Russia geographically extends into the Central Asia region, it is not considered part of the region for the purposes of this ranking. The think tanks in this category excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in the relevant country and region.

Top Think Tanks in China, India, Japan, and the Republic of Korea: The previous “Top Think Tanks in Asia” category underwent revisions in order to prevent an overrepresentation in the region by think tanks in China, India, Japan, and the Republic of Korea. Therefore, we created a separate category for “Top Think Tanks in China, India, Japan, and the Republic of Korea”.

Top Think Tanks in Southeast Asia and the Pacific: This category includes think tanks in Bangladesh, Bhutan, Brunei, Cambodia, Indonesia, Laos, Macao, Malaysia, Maldives, Mongolia, Nepal, North Korea, Pakistan, Philippines, Singapore, Sri Lanka, Taiwan, Thailand and Vietnam.

Top Think Tanks in Central and Eastern Europe: Russia presents perhaps the thorniest case of all, since geographically it could conceivably belong to the Central and Eastern Europe, Central Asia, and Asia and the Pacific categories. To avoid confusion and to respect the fact that most Russian think tanks lie in the extreme west of the country, Russia will remain in the Central and Eastern Europe category. The Central and Eastern Europe category will include Russian think

tanks and think tanks from those countries that lie between Turkey and Russia in the east and Sweden, Germany, Austria, and Italy in the west. Thus, this category will include think tank in Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czech Republic, Estonia, Finland, Hungary, Kosovo, Latvia, Lithuania, Macedonia, Moldova, Montenegro, Poland, Romania, Russia, Serbia, Slovakia, Slovenia and Ukraine.

Top Think Tanks in Western Europe: This category includes think tanks in Andorra, Austria, Belgium, Denmark, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, the Netherlands, Norway, Portugal, San Marino, Spain, Sweden, Switzerland, the United Kingdom and Vatican City.

By Area of Research

Top Transparency and Good Governance Think Tanks: Transparency is a feature that marks the independency of think tanks. There are phantom NGOs and think tanks that actually serve the interest of government or specific individuals and corporations that establish them. A special relationship does exist between funders and thinks tanks that derails the independency and neutral value we believe think tanks should have.

Top Defense and National Security Think Tanks: This category is dedicated to the leading defense and national security institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses of national security, military, and defense policies. These institutions not only strive in developing comprehensive policy initiatives for commercial and government clients, but also offer informative publications readily available to the public. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Domestic Economic Policy Think Tanks: This category is dedicated to the leading domestic economic policy think tanks of the global community. The top think tanks in this category provide superior, innovative research and strategic analyses of domestic economic policy, which covers a wide range of topics such as: the money supply and interest rates, macro and microeconomics, trade and investments, and various other economic areas the government influences. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Education Policy Think Tanks: This category is dedicated to the leading education policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses regarding educational issues to policymakers and the public. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Energy and Resource Policy Think Tanks: This category is dedicated to the leading energy and resource policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analysis on a wide set of issues pertaining to energy and resources such as: energy development, production, distribution, and. These think

tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Environmental Think Tanks: This category is dedicated to the leading environmental policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on various environmental issues of global significance. These think tanks excel in research, analysis, and public engagement on a wide range of environmental policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support, and funding, and improving the overall quality of life in one of the relevant countries.

Top Foreign Policy and International Affairs Think Tanks: This category is dedicated to the leading foreign policy and international affairs institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses pertaining to world affairs, diplomacy, international politics, and economic policy at the domestic and international levels. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Domestic Health Policy Think Tanks: This category is dedicated to the leading domestic health policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics related to domestic health services and goals within the respective country. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Global Health Policy Think Tanks: This category is dedicated to the leading global health policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics related to the health issues and challenges that the global community faces. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top International Development Think Tanks: This category is dedicated to the leading international development institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on developmental challenges and issues facing the international community, such as: agricultural, growth, poverty, inequality, humanitarian, and various other topics related to development. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top International Economic Policy Think Tanks: This category is dedicated to the leading international economic policy institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics pertaining to international economic policy, such as: globalization, international finance, trade, investment, development, and various other topics relevant to global economics. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of

advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Science and Technology Think Tanks: This category is dedicated to the leading science and technology institutions within the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics ranging from innovation and telecommunications to energy, climate, and life sciences. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Social Policy Think Tanks: This category is dedicated to the leading social policy institutions of the global community. The top think tanks in this category provide superior innovative research and strategic analyses on topics pertaining to a wide array of social issues and challenges such as: health care, human services, criminal justice, inequality, education, labor crime and justice, immigration, poverty and other various topics relevant to social policy. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Water Security Think Tanks: This category is dedicated to the leading water security think tanks. The top think tanks in this category provide superior innovative research and strategic analysis on public policy as it relates to water security, which has been defined as "the reliable availability of an acceptable quantity and quality of water for health, livelihoods and production, coupled with an acceptable level of water- related risks". Water security is also the capacity to assure access to an adequate quantity and quality of water to sustain livelihoods, proper health and socio-economic development of people around the world. These think tanks excel in research, analysis and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support and funding, and improving the overall quality of life in one of the relevant countries.

Top Food Security Think Tanks: This category is dedicated to the leading food security think tanks. The top think tanks in this category provide superior innovative research and strategic analyses of the issue of food security. This includes access to sufficient, safe, nutritious food to maintain a healthy quality of life and the social and economic development of communities. Food security generally focuses on the disruption or unavailability of critical food supplies due to risk factors such as: droughts, shipping disruptions, fuel shortages, economic instability, and national and sub-national conflicts. These think tanks excel in research, analysis, and public engagement on a wide range of policy issues with the aim of advancing debate, facilitating cooperation between relevant actors, maintaining public support, and funding, and improving the overall quality of life in one of the relevant countries.

By Special Achievement

Best Advocacy Campaign: Advocacy campaigns are groups of activities or actions that convey the ideas and beliefs of organizations to the public. That being said, advocacy types of think tanks tend to take strong positions on particular policy issues, which may potentially derail the institute's objectivity and consistent value. As a continuum of structure and functions, advocacy think tanks at times mirror to public lobbies and interest groups.

Best For-Profit Think Tanks: Also known as corporate think tank tanks, for-profit think tanks are research organizations that operate as for-profit businesses. In most cases, they are affiliated with a corporation that operates on a for-profit basis. As most think tanks may show structural similarities with organizational siblings, for-profit think tanks are mostly close to government research organizations.

Best Government-Affiliated Think Tanks: Government-affiliated think tanks are those that situate in the government and are considered a part of the government body. Think tanks honored in this category are recognized for outstanding policy research.

Best Institutional Adaptation and Response to COVID-19 Environment: An institution that has been able to redirect its research, programs, and organizational resources to respond effectively to the disruptions caused by global pandemic. This category recognizes the development and production of new types of programming, digital platforms, areas of research and policy recommendations.

Best Institutional Collaboration Involving Two or More Think Tanks: Institution that can network, mobilize and collaborate with two or more think tanks to produce a modest yet achievable set of global public goods.

Best Managed Think Tank: A well-managed think tank should have institutional-level decisions being widely spread among key staff such as organization head, directors, and senior fellows to make sure the information is transparent and shared. Also, upward communication from staff to directors during regular meetings is also important, which ensures mutual understanding and common values are identified within the think tank. Nonetheless, the ability to attract senior analysts in completing organization mission and to provide training plans and workshops that keep the continuum of human capital development are key criteria to reflect organizational control over human resource.

Best New Idea or Paradigm Developed by a Think Tank: The main issue for organizational paradigm is its ability to define the structural design that is appropriate to the fulfillment of functional needs. New idea and paradigm think tanks are ones with solid framework, ways of thinking and methodologies that are specifically developed to meet institutions goals and concerns.

Best New Think Tanks: These are think tanks that have been established in the last 24 months and are centers of excellence.

Think Tank on Cutting Edge of Artificial Intelligence Research: These are organizations that are on the cutting edge of emerging technology trends and the policy issues they generate. The think tanks in this category are think tanks that are working at the intersection of policy and emerging technologies, data management and analytics (Artificial Intelligence, Machine Learning, Data Analytics, Big Data, Predictive Analytics) and their impact on society and public policy.

Best Policy Study/Report Produced by a Think Tank 2018-2020: Quality study/reports that can meet the need of rigorous, policy-oriented research and are accessible to policymakers, media, and the public.

Best Operations Policies, Procedures Developed in Response to the COVID-19 Pandemic: Policies implemented by think tanks in light of changes to the think tank and societal environment of the COVID-19 pandemic, specifically the widespread move to virtual or online

engagement. Examples include video conferencing, use of secure communication channels, modification of research agenda, and social media outreach.

Best Think Tank Conference: A quality conference should be able to bring together academics, practitioners, and policymakers to evaluate and examine global challenges such as financial risks, sustainability, or inequality in the future as a whole.

Best Think Tank Network: Working through a network is a critical factor for a think tank to reach their goals. The ability to expand, mobilize and nurture a network efficiently in an environment where organizations are closely entwined with each other helps to generate momentum for think tanks. Though some think tanks may need more secrecy within networks while others do not base networks on their goal and focus, networking has made the total greater than the sum of all individuals in a comprehensive environment.

Best Think Tanks with Political Party Affiliation: Think tanks that are formally affiliated with a political party and ideology. In the US, they are mostly categorized into Democrats, Republicans, and Independents. As aggregate data from 2014 shows, 39 percent of think tanks identify as Independents, 32 percent as Democrats and 23 percent as Republicans.

Best Trans-disciplinary Research Program at a Think Tank: Transdisciplinary research is a research method in which wide ranges of scholars work jointly with stakeholders. It aims at overcoming the production and demand of knowledge to contribute to solutions of social problems. In other words, it combines scholars of various disciplines together to form new conceptual, theoretical, methodological, and translational innovations that move beyond discipline-specific approaches to address a common problem.

Think Tank to Watch: Think tanks in this category are honored for their excellent research and innovative advances within the past 24 months.

Think Tanks with the Most Significant Impact on Public Policy: Public policy is the means by which a government maintains order or addresses the needs of its citizens through actions defined by its constitution. Public policy is a term used to describe a collection of laws, mandates or regulations established through a political process. Think tanks honored in this category produce research that is impactful and evident in public policy.

Top Think Tanks with Annual Operating Budget of Less Than \$5 Million USD: Think tanks in this category are honored for outstanding research practices and significant research output while operating on a budget of less than \$5 Million USD.

Best Think Tank with the Best Practices (Policies and Procedures) to assure the Quality, Independence, and Integrity of its Policy Research: Think tanks honored in this category adhere to and uphold moral and ethical righteousness in their research practices.

Best Regional Studies Policy Research Think Tank (University-Affiliated): A university-affiliated think tank is a research center dedicated to public policy analysis with the support of a major university, though the degree of this support fluctuates. These think tanks are often part of a specialized school of a university. Alumni networks often function as sources for key contacts in the policymaking community. The degree of affiliation between think tanks and their respective universities can be measured by analyzing the overlap of certain factors. Most are comprised of professors, researchers and fellows hailing from their respective universities, but may also include visiting scholars and visiting fellows. They involve student research through research fellowships and internships as well as undergraduate and graduate programs. While some of these think tanks rely on facilities and staff of their respective universities to conduct research, most of them determine the research to be conducted independently. Most of these think tanks

raise funds specific to their research through grants from individuals, foundations, organizations, and governments, while they may also receive financial support from their respective university. Buildings housing these think tanks tend to be located on their respective universities' campuses. They also have access to other university facilities, such as libraries and research labs, and many of the organizations also have facilities in additional locations.

Best Regional Studies Policy Research Center (Free-Standing, Not University-Affiliated): Think Tanks honored in this category are independent of government or university affiliation and are self-governing institutions. These institutions are autonomous and produce quality research that is objective and unbiased.

2020 Global Go-To Think Tank Index Nomination and Ranking Criteria

The peers and experts who participated in the indexing process were encouraged to employ the following criteria when considering nominations and rankings. The 2020 GGTTI Nomination and Ranking Criteria include, but are not limited to, the following criteria:

- The quality and commitment of the think tank's leadership (chief executive and governing body). This involves effectively managing the mission and programs of the think tank, mobilizing the financial and human resources necessary to fulfill the mission and monitoring the quality, independence, and impact of the think tank.
- The quality and reputation of the think tank's staff. Ability to assemble a critical mass of highly skilled, experienced, and productive scholars and analysts who are recognized as either emerging or established experts in their respective area of research.
- The quality and reputation of the research and analysis produced. The ability to produce high quality, rigorous, policy-oriented research that is accessible to policymakers, media, and the public.
- Ability to recruit and retain elite scholars and analysts.
- Academic performance and reputation. This involves the academic rigor associated with the research conducted. This includes formal accreditation of a think tank's scholars and analysts, and the number and type of scholarly publications produced such as: books, journals and conference papers, the number of presentations delivered at scholarly and other professional meetings and the number and type of citations of the think tanks scholars' research in scholarly publications produced by other scholars.
- The quality, number and reach of its publications.
- The impact of a think tank's research and programs on policymakers and other policy actors. Policy recommendations considered or actually adopted by policymakers, civil society or policy actors.
- Reputation with policymakers (name recognition associated with specific issues or programs, number of briefings and official appointments, number of policy briefs and white papers produced, and legislative testimony delivered).

- A demonstrated commitment to producing independent research and analysis. This involves standards and policies for producing rigorous evidence-based research and analysis that are posted and monitored by the organization, research teams and individual researchers. This includes disclosure of conflict of interest (financial, institutional, or personal) and a commitment to nonpartisanship and established professional standards for research in the social sciences.
- Access to key institutions. The ability to reach and connect with key audiences and personnel such as government officials (elected and appointed), civil society, traditional and new media, and academia.
- Ability to convene key policy actors and to develop effective networks and partnerships with other think tanks and policy actors.
- Overall output of the organization (policy proposals, web visits, briefings, publications, interviews, conferences, and staff nominated to official posts).
- Utilization of research, policy proposal and other products. The effective transmission and utilization of policy briefs, reports, policy recommendations and other products by policymakers and the policy community, number of current and former staff serving in advisory roles to policymakers, advisory commissions and awards given to scholars for scholarly achievement or public service.
- Usefulness of organization's information in public engagement, advocacy work, preparing legislation or testimony, preparing academic papers or presentations, and conducting research or teaching.
- Ability to use electronic, print, and new media to communicate research and reach key audiences.
- Media reputation (number of media appearances, interviews, and citations).
- Ability to use the Internet including social media tools, to engage with policymakers, journalists, and the public.
- Website and digital presence. The quality, accessibility, and effective maintenance of the organization's web presence, as well as the quality and level of digital traffic and engagement (quality, accessibility and navigability of website, number of website visitors, page views, time spent on pages and "likes" or followers).
- Level, diversity, and stability of funding. The ability of an organization to mobilize the necessary financial resources to support and sustain the think tank over time (endowment, membership fees, annual donations, government, and private contracts, and earned income).
- Effective management and allocation of financial and human resources. The ability of a think tank to effectively manage its money and people so that they produce high quality outputs that achieve maximum impact.
- Ability of the organization to effectively fulfill the terms of the gifts, grants and contracts from government(s), individuals, corporations, and foundations who have provided financial support to the think tank (financial stewardship).

- The organization's ability to produce new knowledge, innovative policy proposals or alternative ideas on policy.
- Ability to bridge the gap between the academic and policymaking communities.
- Ability to bridge the gap between policymakers and the public.
- Ability to include new voices in the policymaking process.
- Ability of organization to be inscribed within issue and policy networks.
- Success in challenging the traditional wisdom of policymakers and in generating innovative policy ideas and programs.
- The impact on society. Direct relationship between the organization's efforts in a particular area to a positive change in societal values such as significant changes in the quality of life within respective country (amounts of goods and services available to citizens, state of physical and mental health, quality of environment, quality of political rights and access to institutions).

Think Tank Impact Assessment Tool

Clearly, assessing the impact of think tanks is not an easy endeavor to undertake given the various and conflicting actors, events and politics involved in the policymaking process. Despite the significant challenges in establishing a causal relationship between knowledge and policy, it is necessary for think tanks to understand and effectively respond to the growing chorus of questions being raised by donors, journalists and the public about the role and influence of think tanks in civil societies and governments around the world.

Think tanks can employ a variety of metrics to assess their impact, including such measures as increasing the research and analysis they produce as well as accounting for their contributions to the policymaking environment and civil society. Dr. McGann's research (2008) has focused on developing a comprehensive assessment tool for evaluating a think tank's impact. The impetus for this research, in part, was the apparent confusion that exists about the differences between outputs and impacts. In various studies and surveys that Dr. McGann has conducted over the years, researchers and think tanks responded curiously when asked about the impact on public policy and how they measure it. The overwhelming response was to provide a list of research outputs (number of books published, conference held, web hits, media appearances, etc.). Outputs, however, are not the only way to measure impact.

The metric provided below is designed to serve as a catalyst for a discussion on how to effectively measure the impact of think tanks. It is provided here as background for the think tank ranking process in the hopes that it will help clarify the distinction between outputs and impacts. We ask that you consider the following indicators when contemplating the impact of think tanks:

- **Resource indicators:** Ability to recruit and retain leading scholars and analysts; the level, quality and stability of financial support; proximity and access to decision-makers and other policy elites; a staff with the ability to conduct rigorous research and produce timely and incisive analysis; institutional currency; quality and reliability of networks; and key contacts in the policy academic communities and the media.
- **Utilization indicators:** Reputation as a "go-to" organization by media and policy elites in the country; quantity and quality of media appearances and citations, web hits, testimony before legislative and executive bodies; briefings, official appointments, consultation by officials or departments and agencies; books sold; reports distributed; references made to research and analysis in scholarly and popular publications; and attendees at conferences and seminars organized.
- **Output indicators:** Number and quality of policy proposals and ideas generated; publications produced (books, journal articles, policy briefs, etc.); news interviews conducted; briefings, conferences and seminars organized; and staff who are nominated to advisory and government posts.
- **Impact indicators:** Recommendations considered or adopted by policymakers and civil society organizations; issue network centrality; advisory role to political parties, candidates and transition teams; awards granted; publication within or citation of publications in academic journals, public testimony and the media that influences the policy debate and decision-making; listserv and website dominance; and success in

challenging the conventional wisdom and standard operating procedures of bureaucrats and elected officials in the country.

Beyond this qualitative assessment, an effective evaluation of impact should also involve NGOs, as well as members of the government and policymaking community, to ascertain the degree to which they have utilized the grantee's research output. This participation can be obtained through interviews, surveys, questionnaires and focus group meetings, utilizing the outcome mapping technique which "moves away from assessing the products of an activity or a program to focus on changes in behaviors and relationships (outcomes) which can lead to changes." Impact can be viewed as positive if it "changes the behavior, relationships, activities, or actions of the people, groups, and organizations with whom a program works directly."

Although this qualitative assessment is essential because it recognizes that policy impact can be successfully achieved even if policy prescriptions are not directly translated into actual policy, we recommend that this assessment should be translated into numerical rankings, thereby allowing comparisons with baseline data for effective monitoring and evaluation in the future.

2020 Think Tank Statistics

Global Distribution of Think Tanks by Region and Number of Think Tanks in the World 2020

This chart reflects the number of think tanks in 2020 based on data collected as of the summer of 2020.

REGION	NUMBER OF THINK TANKS
EUROPE	2932
NORTH AMERICA	2397
ASIA	3389
SOUTH & CENTRAL AMERICA	1179

2020 Ranking Categories

Top Think Tanks in the World

- Think Tank of the Year 2020 – Top Think Tank in the World
- Top Think Tanks Worldwide – (Non-US)
- Top Think Tanks Worldwide – (US and non-US)

Top Think Tanks by Region

- Top Think Tanks in Sub-Saharan Africa
- Top Think Tanks in Canada and Mexico
- Top Think Tanks in Central and South America
- Top Think Tanks in the United States
- Top Think Tanks in Central Asia
- Top Think Tanks in China, India, Japan, and the Republic of Korea
- Top Think Tanks in Southeast Asia and the Pacific
- Top Think Tanks in Central and Eastern Europe
- Top Think Tanks in Western Europe
- Top Think Tanks in the Middle East and North Africa (MENA)

Top Think Tanks by Area of Research

- Top Defense and National Security Think Tanks
- Top Domestic Economic Policy Think Tanks
- Top Education Policy Think Tanks
- Top Energy and Resource Policy Think Tanks
- Top Environment Think Tanks
- Top Foreign Policy and International Affairs Think Tanks
- Top Domestic Health Policy Think Tanks

- Top Global Health Policy Think Tanks
- Top International Development Think Tanks
- Top International Economic Policy Think Tanks
- Top Science and Technology Think Tanks
- Top Social Policy Think Tanks
- Top Transparency and Good Governance Think Tanks
- Top Water Security Think Tanks
- Top Food Security Think Tanks

Top Think Tanks by Special Achievement

- Best Advocacy Campaign
- Best For-Profit Think Tanks
- Best Government-Affiliated Think Tanks
- Best Institutional Collaboration Involving Two or More Think Tanks
- Best Managed Think Tank
- Best New Idea or Paradigm Developed by a Think Tank
- Best New Think Tanks (Unranked)
- Best Independent Think Tank
- Best Policy Study/Report Produced by a Think Tank
- Best Think Tank Conference
- Best Policy Study/Report Produced by a Think Tank
- Best Think Tank Network
- Best Think Tanks with Political Party Affiliation
- Best Transdisciplinary Research Program at a Think Tank
- Best University-Affiliated Think Tanks
- Best Use of Social Networks
- Think Tank on the Cutting Edge of Artificial Intelligence Research

- Think Tank to Watch
- Think Tanks with the Best External Relations/Public Engagement Programs
- Think Tanks with the Best Use of the Internet
- Think Tanks with the Best Use of the Media (Print or Electronic)
- Think Tanks with the Most Innovative Policy Ideas/Proposals
- Think Tanks with the Most Significant Impact on Public Policy
- Think Tanks with Outstanding Policy-Oriented Public Programs
- Top Think Tanks with Annual Operating Budgets of Less Than \$5 Million USD
- Think Tank with the Best Practices (Policies and Procedures) to Assure the Quality, Independence and Integrity of its Policy Research

2020 GLOBAL GO TO RANKING RESULTS

In advance of presenting this year's results, I would like to stress that the inclusion of an institution in the universe of leading think tanks does not indicate a seal of approval or endorsement of the institution, its publications or its programs on the part of the Think Tanks and Civil Societies Program.

Likewise, a failure to be nominated does not necessarily indicate a lack of quality and effectiveness or poor performance. There are over 11,175 think tanks that are doing exceptional work to help bridge the gap between knowledge and policy. This report is no more than an effort to highlight some of the leading think tanks worldwide.

A change to the 2020 Global Go To Think Tank Index rankings is that any think tank that has been ranked as the top think tank (#1) in a category for 3 consecutive years will be recognized as a Center of Excellence and will not be included in the rankings for that category for the next 3 years. It will be recognized as a Center of Excellence for achieving this level of distinction as a think tank center of excellence.

With that, it gives me great satisfaction and pleasure to present the results of the 2020 rankings process below.

**THINK TANK OF THE YEAR – TOP THINK TANK IN THE WORLD
Center of Excellence for 2017-2020**

Brookings Institution (United States)

**2020 THINK TANK OF THE YEAR –
TOP THINK TANK IN THE WORLD**

Background on the Think Tanks and Civil Societies Program

Think Tanks and Civil Societies Program

The Think Tanks and Civil Societies Program (TTCSP) of the Lauder Institute at the University of Pennsylvania conducts research on the role policy institutes play in governments and civil societies around the world. Often referred to as the “think tanks’ think tank,” TTCSP examines the evolving role and character of public policy research organizations. Over the last 30 years, TTCSP has developed and led a series of global initiatives that have helped bridge the gap between knowledge and policy in critical policy areas such as international peace and security, globalization and governance, international economics, environmental issues, information and society, poverty alleviation, and healthcare and global health. These international collaborative efforts are designed to establish regional and international networks of policy institutes and communities that improve policymaking while strengthening democratic institutions and civil societies around the world.

TTCSP works with leading scholars and practitioners from think tanks and universities in a variety of collaborative efforts and programs and produces the annual Global Go To Think Tank Index that ranks the world’s leading think tanks in a variety of categories. This is achieved with the help of a panel of over 1,900 peer institutions and experts from the print and electronic media, academia, public and private donor institutions and governments around the world. We have strong relationships with leading think tanks around the world, and our annual Think Tank Index is used by academics, journalists, donors and the public to locate and connect with the leading centers of public policy research around the world. Our goal is to increase the profile and performance of think tanks and raise the public awareness of the important role think tanks play in governments and civil societies around the globe.

Since its inception in 1989, TTCSP has focused on collecting data and conducting research on think tank trends and the role think tanks play as civil society actors in the policymaking process. In 2007, TTCSP developed and launched the global index of think tanks, which is designed to identify and recognize centers of excellence in all the major areas of public policy research and in every region of the world. To date, TTCSP has provided technical assistance and capacity building programs in 81 countries. We are now working to create regional and global networks of think tanks in an effort to facilitate collaboration and the production of a modest yet achievable set of global public goods. Our goal is to create lasting institutional and state-level partnerships by engaging and mobilizing think tanks that have demonstrated their ability to produce high-quality policy research and shape popular and elite opinion and actions for public good.

Think Tank Regional and Global Summits

Since June 2012, the Think Tanks and Civil Societies Program (TTCSP)—in cooperation with its regional partners—has co-sponsored and organized regional and global think tank summits. The

purpose of these summits is to engage think tanks in peer-to-peer dialogue, knowledge exchange and capacity-building to help improve the image, profile and performance of think tanks in every region of the world. In addition, we plan to demonstrate the efficacy of creating a global network that engages the leading think tanks in a peer-to-peer exchange of innovative policies and best practices for research and public engagement on key domestic and international issues. The value of these summits has been clearly demonstrated by the fact that all of the summit partners and participants have agreed to partner with TTCSP to organize summits on an annual basis. A number of institutional partnerships between leading think tanks have been formed as a direct result of these summits. Each summit is expected to have an impact on the think tanks in each region with a set of action-oriented recommendations. The summits have helped facilitate regional and global partnerships and programs and the summit recommendations demonstrate that each meeting is a “catalyst for ideas and action.”

While the regional partners’ contributions to the summits vary, many serve as the hosts for the summit and mobilize local and regional support for them. Often this involves providing in-country logistical support, the venue and significant in-kind support and a financial contribution.

The role of TTCSP has been to convene the think tanks and provide the conceptual framework for the summits. This is done in conjunction with our regional partners and based on the research, global think tank index and surveys conducted by TTCSP.

All previous summit reports can be found here:
https://repository.upenn.edu/ttcsp_summitreports/

2020 & 2021 Think Tank Summits and Fora Schedule

September 18, 2020: VIRTUAL Latin America Think Tank Summit, 8:30—10:30 AM EST

September 23, 2020: VIRTUAL Central and Eastern European Think Tank Summit, 8:30—10:30 AM EST

October 6, 2020: Global Call for Ideas, Innovation and Action: The 75th Anniversary of the UN, 8:30—10:30AM EST

October 13, 2020: VIRTUAL Asia Think Tank Summit, 7:00—9:00 AM EST

October 30, 2020: VIRTUAL Europe Think Tank Summit, 8:30—10:30 AM EST

November 13, 2020: VIRTUAL Global Summit, 8:30—10:30 AM EST

November 13, 2020: VIRTUAL North America Think Tank Summit, 3:30—5:00 PM EST

November 24, 2020: VIRTUAL China Think Tanks Innovations Forum, 7:00—9:00 AM EST

December 4, 2020: VIRTUAL Africa Think Tank Summit, 8:30—10:30 AM EST

December 11, 2020: VIRTUAL Middle East & North Africa Summit, 8:30—10:30 AM EST

2021 Think Tank Summits (in person with dates and times to be determined):

- Asia Think Tank Summit, Republic of Korea
- Europe Think Tank Summit, The Netherlands

- MENA and Global Think Tank Summit, Bahrain
- North America Think Tank Summit, Washington, D.C.
- Latin America Think Tank Summit, Chile

2020 Global Go To Think Tank Index

The Global Go To Think Tank Index (GGTTTI) has become the gold standard of excellence for think tanks around the world and is widely cited by donors, journals, think tanks, and policymakers. More importantly, it has served to raise the profile and performance of think tanks. The 2016 GGTTTI marked the 10th year of the publication of the Index report and with each year the ranking's influence has grown. For the past several years, the Global Think Tank Index Report has been launched at the World Bank and the United Nations in January. Over 3,190 academics, policymakers, journalists, and think tank scholars and executives completed the annual indexing process. The 2020 Global Go To Think Tank Index will be released on January 30, 2020.

The Lauder Institute of Management and International Studies

The Lauder Institute of Management and International Studies offers an M.A. in international studies and conducts fundamental and policy-oriented research on current economic, political and business issues. It organizes an annual conference that brings academics, practitioners and policymakers together to examine global challenges such as financial risks, sustainability, inequality and the future of the state.

University of Pennsylvania

The University of Pennsylvania (Penn) is an Ivy League school with highly selective admissions and a history of innovation in interdisciplinary education and scholarship. Its peer institutions are Harvard, Stanford, Columbia, Brown, Dartmouth, and the University of Chicago in the US, and Oxford and Cambridge in the UK. A world-class research institution, Penn boasts a picturesque campus in the middle of Philadelphia, a dynamic city that is conveniently located between Washington, D.C., and New York, New York.

Penn was founded by Benjamin Franklin in 1740 to push the frontiers of knowledge and benefit society by integrating study in the liberal arts and sciences with opportunities for research and practical, pre-professional training at both the undergraduate and graduate levels. Penn is committed to meeting the full demonstrated need of all undergraduates with grant-based financial aid, making this intellectually compelling integration of liberal and professional education accessible to talented students of all backgrounds and empowering them to make an impact on the world.

The Research Team

Program Director

James G. McGann, Ph.D., is a senior lecturer at the Lauder Institute of the Wharton School and the School of Arts and Sciences at the University of Pennsylvania. He is also the director of the Think Tanks and Civil Societies Program (TTCSP) at the University of Pennsylvania. He conducts research on the trends and challenges facing think tanks and policymakers around the world and provides advice and technical assistance to think tanks, governments and public and private donors on how to improve the quality and impact of policy research. He is also a senior fellow at the Foreign Policy Research Institute, a think tank based in Philadelphia.

Prior to coming to the University of Pennsylvania, Dr. McGann was an assistant professor of Political Science at Villanova University where he taught international relations, international organizations and international law. His current research interests include assessing global trends in security and international affairs research; the role of think tanks in shaping US domestic and foreign policy; think tanks and policy advice in the BRICS and G20 countries and transnational threats and global public policy. He is the creator and author of the annual Global Go To Think Tank Index which ranks think tanks in every region of the world and major areas of public policy research.

Dr. McGann has served as a consultant and advisor to the World Bank; the United Nations; the United States Agency for International Development; the Soros, Rockefeller, MacArthur, Hewlett, and Gates foundations; the Carnegie Corporation; and foreign governments on the role of nongovernmental, public policy and public engagement organizations in the US and developing and transitional countries. He has served as the Senior Vice President for the Executive Council on Foreign Diplomats, the public policy program officer for the Pew Charitable Trusts, the assistant director of the Institute of Politics, John F. Kennedy School of Government at Harvard University. He also served as a senior advisor to the Citizens' Network for Foreign Affairs and the Society for International Development.

TTCSP Research Internship Program

The Think Tanks and Civil Societies Program (TTCSP) runs a highly selective internship program for students (grad and undergrad; domestic and international) who are interested in gaining first-hand experience in public policy research in domestic and international affairs. Over 125 students from across the University of Pennsylvania and from area colleges and universities participated in TTCSP Research Internship Program during the 2020 year. Over 30 interns from the Program have been successfully placed in internships in the US and abroad in locations such as France, Argentina, Jordan, Brazil, England and Spain.

Appendices

APPENDIX A: Email Inviting Peers and Expert Panelists to Rank 2020 Nominated Institutions

Dear Colleague:

I am writing to invite you to help rank the think tanks for the 2020 Global Go To Think Tank Index of the world's leading think tanks. THE RANKING ROUND WILL RUN FROM OCTOBER 15, 2020-NOVEMBER 15, 2020. Click the blue button below to start the survey.

We are still accepting nominations of individuals for the expert panels so please send the names, titles and email of individuals that you would like to invite to join the 2020 Global Go To Think Tank Index Expert Panel.

We encourage you to participate in 2020 Global Go To Think Tank Index rankings process so the think tanks in your country and regions can be properly reflected in the survey findings. We are requesting that you now rank the think tanks that list in all the categories where you knowledge and experience with the institutions that are listed.

The rankings are broken into three sections: 1. region/location; 2. area of public policy research and 3. special achievement.

The findings of the 2020 rankings will be reviewed by a group global panel of experts who will make the final selections. The international panels of experts will use the collective input of individuals like you to make informed choices for the 2020 ranking of the world's leading think tanks.

After filling out your name, title, institutional affiliation, country and e-mail address, etc. please use the drop-down menu to make your selection(s) for think tank rankings.

Please review the lists of think tanks in the drop-down menus under every question to rank the listed of nominated institutions. You can reenter the survey as many times as you like to compete or revise your rankings.

Think Tanks are listed in alphabetical order (A-Z). You must scroll down the list to make your selection. You can only make one selection at a time and it should be in rank order.

Please make sure you save the link to the survey that we sent you if you plan to re-enter the survey.

YOU CAN NOT FORWARD THE LINK. IT IS UNIQUE TO YOUR EMAIL ADDRESS.

Please note: when completing the survey, do NOT use the "back" button on your internet browser, this will erase your answers. Instead, use the "prev" button on the bottom of the

survey page.

PLEASE RESIST THE TEMPTATION TO RANK YOUR OWN ORGANIZATION - THAT IS STRICTLY FORBIDDEN AND CLOSELY MONITORED.

Finally, please bring any glowing omissions, gross anomalies or irregularities to our attention immediately so we can share them with the expert panel members. There is a form at the end of each category so you can submit your additions, comments and suggestions.

WE HAVE ALSO ADDED A QUESTION AT THE END OF THE SURVEY WHERE YOU CAN SUBMIT YOUR COMMENTS AND SUGGESTIONS.

Thank you for your participation and continued interest in our research on think tanks and civil societies around the world.

Sincerely,

James G. McGann, PhD

APPENDIX B: Email Inviting Peers and Expert Panelists to Host “Why Think Tanks and Facts Matter” Events

Follow Up Letter

Dear Friends and Colleagues:

I am writing you to invite you to join 100s of think tanks and other civil society actors in global cities around the world in January 2021 for a unique global program. The program will involve a series of coordinated events that are intended to highlight the important role think tanks play in governments and civil societies around the world. A copy of some sample programs from the last couple of years is attached.

The annual Why Think Tanks Matter Forum and the 2020 Global Go To Think Tank Report Launch are scheduled for January 28, 2021 and will take place over 2 days in Paris, Beijing, London, Washington DC, New York and approximately 140 other cities around the world.

We are hoping that you will agree to host a launch event in your city.

If you would like to host a Think Tank Issues Forum and/or the 2020 Global Go To Think Tank Index Report Launch on January 28, 2021, please use the link below to register.

Think Tank Issues Forum and 2020 Global Go To Think Tank Index Launch Registration Sheet:

Over 80 think tanks have already agreed to host events in their countries and cities. Our goal is to have 120 events around the world.

The theme for this year's launch is "**Why Think Tanks Matter to Policymakers and the Public.**" While recent think tank growth has been nothing short of explosive, the relationship between these organizations and the policymaking process is not completely understood. The Think Tank Launch Events on January 28th is intended to provide concrete examples of the research and educational programs produced by these institutions and how it serves policymakers and the public.

Our hope is that each local host will organize a Program within the thematic framework of **WHY THINK TANKS MATTER**. The goal is to highlight the critical work think tanks perform in countries around the world. You are encouraged to engage other think tanks and IGOs, media, policymakers and other policy actors in your country as you develop your Event.

our event should explain what think tanks are, what they do, what value they add and why think tanks are more important than ever before. In the competitive marketplace of ideas and policy advice it is essential that we make the case and provide tangible examples of the important role think tanks in countries around the world. The objective of the Why Think Tanks Matter Events is to have think tanks around the world provide compelling examples the critical work think tanks perform in a range of political and economic contexts. We also hope that by joining together on January 28, 2021 we can make a strong case for Why Think Tanks Matter.

Please send us your draft program once you have prepared it.

Additional information will be provided in the coming weeks. I wanted to thank you once again for joining us for this important global event.

All the best,

Jim McGann
