

A stylized graphic consisting of a series of overlapping, semi-transparent blue rectangles that create a sense of depth and movement, appearing to recede into the distance. A thick, vibrant blue curved line sweeps across the middle of the composition, intersecting the graphic. A small red square is positioned at the point where the graphic elements meet the curve.

WELCOME TO

WORLD
WIDE

LIVE LLC

We are a team of award-winning broadcasters, digital media innovators and distinguished entrepreneurs committed to creating disruptive technologies that transform and empower people, companies and organizations to engage the digital world, one smartphone at a time.

We believe whoever controls social media, controls the media!

And what could be a key to winning beyond 2020?

~Activating millions of Smartphones that cannot be censored or blocked!

My Live® transforms smartphones and computers
into a safe, secure, and discrete 'state of the art'
Rapid Response Broadcast System.

Next Gen Citizen Journalism capable of powerful broadcast and social media coverage
of critical issues like Covid 19, Healthcare, Politics, Sports, Law & Order and the Economy.

The My Live Rapid Response Broadcast System

- Cloud-based and available on any designated computer, laptop or tablet.
- Crowdsourcing.
- Data retrieval from every video.
- Closed or Open Platform

The **My LIVE**TM Rapid Response Features

My LIVE App makes studio to field communication (IFB, Text, Conference Call, and On-Air Tally) possible on your smartphone.

Our Exclusive CCR Control Center allows organizations to access, cue, and switch multiple incoming feeds into their broadcasts.

Worldwide Live's cloud-based Asset Management System provides searchable access to our exclusive database of videos and images.

Drone Interface allows live feeding of drone video to social and news media organizations.

Integrated facial recognition give users the capability to immediately identify people, places, and objects.

My LIVE

Rapid Response Broadcast System

Citizen Journalists anywhere in the world, can field report breaking news.
Multiple phones can be integrated into switched feeds of any planned or spontaneous event...instantly.
