

Phil Schneider - November 1995 (Full Video)

📅 Sat, 3/6 4:35PM ⌚ 1:10:27

SUMMARY KEYWORDS

called, people, alien, government, underground bases, built, bases, employed, new world order, years, geologist, underground, supposedly, groom lake, tunnels, technology, kinds, black, phil schneider, flying

SPEAKERS

host, Phil, Phil Schneider

host 01:06

I met Phil over the telephone approximately three years ago, and in person about two years ago. And during that period of time I became very well acquainted with him. He was, at that time still working for the government. And he didn't say much about what he did. But nonetheless, over a period of time I became well acquainted with him, I found him to be a person of integrity and honesty. And about one year ago, he became totally fed up with the New World Order and the establishment, he thought he was working for the betterment of mankind and the work that he was doing as a geologist for our government, as well as for NATO. And he found out that it could be and was actually anything but that. So his revelations became, in many respects my revelations, and I urged him last winter and spring to go public and lecture finally got him out. He's given over 30 lectures to date. All very successful, very interesting. In fact, so successful there have been 13 attempts on his life since the beginning of the year. And he's survived them all. Well, I can say is, God must be protecting him because he has a message. So without further ado, I would like to introduce Mr. Phil Schneider and understand also everything is being recorded and the video and audio tapes will be available later. Please give a warm welcome to Phil Schneider.

P

Phil Schneider 02:37

I guess I can always start off by saying loose lips sink ships. That's almost a pun anymore. I'm Phil Schneider. I worked 17 years for the United States government as a geologist and aerospace engineer as well as a structural engineer. I worked for such elusive and elusive occupations with Morrison Knudsen back to page and Paige arrow speci, Allah France and a host of other eg and G and a host of other Los Alamos laboratory, nice kind of things. But rather than bore you with all those statistics, I've got a cup of real mixed bag here of different topics and it's might be a little bit like brain overload. But

P

Phil 03:41

I'll start from the beginning. Like I said, I work 17 years. co invented methods of shape charge blasting as well as laser rock D flag aeration, which means rock is literally melted or or or powdered by a special maser laser combination. And the residue of the rock underneath is as applied as a coating as a liquid coating, kind of like instant agate, if you could imagine a hunk of agate, which is a hard silica mineral rock actually. But

P

Phil Schneider 04:30

up here we have another topic. This is an area where I worked. I worked 11 years of the 17 years at groom Lake as far as to say in the Nellis Air Force Base area. In fact, groom lake is I'll show you in the picture right here. Right here. Groom lake is Quite the place. A lot of rumors and other kinds of things have come out of there. Of course, people have stood on the outside for years and wondered what's been flying. There's all kinds of things with flying. Let me give you a brief overview. Start in ancient history land here. Back in 1909, the US cavalry was engaged in, catching some Bandidos that have crossed over the Mexican border into a place called Truth or Consequences, New Mexico, and they went into a cave or hide out of and killed the so called bandits. But what they found out they couldn't explain. And they were called horseshoe craft at that time, or horseshoe ships.

P

Phil 05:49

They were UFOs and saw these, what they call demons, gray demons, little gray guys, all all around the place. How's the 99 1933 our government was actively engaged with the Europeans, mostly the French and the English and specials, researches dealing with aerial phenomenon. And once again, the term flying saucer or flying disc didn't come about until much later. Supposedly, right around the mid 1940s. Anyway, the whole thing here is that also in 1946, I might want to add, we were engaged in atomic bomb testing and this this kind of a like, and, of course, the area of Bikini Atoll. Some of the pictures are over here on the whiteboard showing with the actual language of the both the US Army and US Navy

archives.

P

Phil Schneider 07:07

Anyway, these flying ships, we're seeing 1945 46 some of them are called Foo Fighters, and you name it. We're fully known about maybe as early as 1935, or 36 by a US Navy. And there was a shallow underwater base at Makini Island. And that was probably the one reason why a number of atomic bombs were exploded in that area rather than other areas which they could have been even more remote out a South Pacific and operation crossroads.

P

Phil 07:50

Well, Anyway, this all led up to later on 568 years later, in 1954. During the Eisenhower administration, he led to a interesting treaty called the create a 1954 Treaty was the alien human treaty. And supposedly the aliens that come in and exchange technology and they want to take an occasional human being and a few head of cows and accurate books were supposedly to be kept in all this kind of stuff. And of course, eventually, all that broke down. And aliens are notorious for being liars, even greater liars and so called in quote we humans are.

P

Phil Schneider 08:42

So alien treaties are often just not even the pieces of paper they're written on. They're just really kind of worthless. Anyway, my work as a geologist and building underground military bases, some of which are over two miles underground. And I think when you listen to AI tonight, if you have a chance to listen to Him, He will speak of AI's actually been on some of the high speed monorail subway cars if you might want to call them that link these bases together, some of them are capable of riding on a cushion of air about three quarters of an inch off a rail,

P

Phil 09:27

better part of Mach two. And he's actually been on one of these trains I've only been in one of the tunnels and helped build some of the tunnels. Incidentally, I helped work on 13 deep underground military basis actual had hands on experience. notorious was the one and in around the Delta, a the southern of southeastern and Southwestern sides adultery, New Mexico and Los Alamos laboratory regions where we built some hermetically sealed rooms that were very deep going down over a mile. We also built an Additions on to groom lake and s two and s four complexes.

Phil Schneider 10:15

There are a total of nine, underground or cold. They're called dumbs like you can learn a lot from this dummy but didn't do MB stands for deep underground military base. And, or a deep underground dumb to for instance, is a submarine base. And I have built a few of those too, which are off our continental shelves and certain islands, out in the Atlantic and the Pacific, in strategic locations. All this can hardly in an hour's time, I could hardly squeeze all this in. So I'll be kind of rambling here if you just bear with me, the

Phil 10:57

main topic of my discussion here is to link up basically what's going on with these deep underground military bases what they're being used for what is the present situation now being employed, both by our federal government, which is slowly being phased out by the United Nations government, as well as the new world in quote, the New World Order, which is even higher entity and who these higher entities are taking their orders from, and try and link up basically, what's going on.

Phil Schneider 11:35

A lot of us have been kept in the dark, we've been given, maybe most recently, over here, photographs of an alien at Roswell, just very make a very brief statement about that. The photographs cannot stand up to a computer grain analysis test and therefore are retouched or faked. They're not real, the real one, the real photograph of the of the chart are dead alien that was one of the several that were autopsy this over here was given to me by a friend by the name of Skip Frombag of Seattle. And his father worked as one of the principal doctors, he was from Germany at the time and worked on some of the autopsy material from what I understand along with other people, anyway.

Phil 12:34

Don't you just can't believe everything. And that goes for me. You got to get out there and do your homework like I always say. You might. Don't put your spectacles on you put your skeptically on when you listen to me. So if we can, if we can have a show of hands here how many people have heard about Roswell, New Mexico? Very good, almost all. And how many people have heard about the black helicopters and the other kinds of flying saucers type equipments out at groom lake and other places pretty good.

Phil Schneider 13:14

Well, this, obviously is a nice enlightened audience. Most of you have probably seen what a black helicopter is, or maybe even gotten rare glimpses of an F 117, a black jet or stealth, as they're often called. Or a B, two bomber B, one bomber some of these other sophisticated aircraft that are now being touted as the new technology once again, and where did we get this new technology? Well, obviously we've had a little hand in that. Our little alien, so called buddies Haha, have it kind of exchanged things not without a great cost, the cost of which has been, a lot of people have disappeared. Some, and I'll blow this statistic by you there's, according to current FBI and Defense Intelligence Agency and CIA statistics, 100,000 children, and 1 million adults disappear every year. And these are not kidnappings or murderers or rapes or suicides or anything, totally unaccounted for, and warning these people going.

P

Phil 14:32

Nobody knows. Maybe one of us in this room or somebody has, has encountered such an individual and lost a loved one or a friend or something. And that's Unfortunately, my best friend Rob Lee Rummel several years ago got himself murdered because we dare to put out in print at that time. Still working for the government. And so as he we dare to put in print that so called the Strategic Defense Initiative or Star Wars as part of the New World Order and takes its actions It was originally written as a kind of a spoof or a joke. We had one of these alien greys dressed up and had a new world order in Sydney on and of course, that wasn't taken very nicely.

P

Phil Schneider 15:29

My friend got himself murdered. It was called a suicide but now it's been turned over to special authorities have now acknowledged it was a homicide. Other than that, I'd like to also mention something about my father. My father was a u boat captain, in Hitler's Navy. And he got captured and taken over. I didn't find this out until about two weeks before he died on his deathbed, he kind of told everybody in total shock. I was one of them.

P

Phil 16:11

For either fact, I didn't believe my thought it was kind of built in delirium or something like that. And of course, other things have come up since. And so anyway, he was captured by the French turned over the Third Army, US Third Army, US Third Army term over the Navy. And he was a master machinist. That's not a journeyman the master means they can take a block of metal and make a gun or a watch or some other flying instrument. And he was a master machinist. He later became an MD doctor and part of the aerospace medicine group. The United States Navy was instrumental in helping build the USS Nautilus and its

first nuclear power

P

Phil Schneider 16:59

predecessor, the enterprise and the first nuclear powered aircraft carrier and other other ships like it. He pioneered all the ways and and building very small miniature nuclear engines. He even helped build health worker later on in his life, he helped develop the infamous grid bed nuclear motor which is now employed. And some things that look like flying saucers that people claim are flying saucers. Yes, we are. We in quote, the United States Air Force and other armed forces are training. Other European forces to fly and identify are now identified or, in quote, flying saucers, we've actually built built several prototypes that are flying under the under names of black craft.

P

Phil 18:01

My position as a geologist and engineer, got me to see a lot of things in the world. I've been in over 70 countries. also work for NATO, I carried a level three security clearance with Orion light factor rhyolite is a hardening factor, only given out to a handful of civilians, maybe a couple of 100 military men worldwide. I thought I was doing the nation, the United States, as well as the world a favor by I thought I was kind of keeping my end.

P

Phil Schneider 18:47

Well, it didn't work out that way. And I was to later find out that these underground bases are now being employed as strategic basis for in case there is martial law in this country. Right now, our military professors that used to be in war colleges and the like, are training people like ex Russian KGB and Spetsnaz people right here on American soil. I've seen it with my own two eyes, along with other people, other geologists. By the way, I'm still geologists still do geological survey work. However, I don't work for the government and took my security clearance and all my government stuff and cut it up and send it back to the pardon my French sob

P

Phil 19:40

when I found out that a number of days 131. deep underground military bases are being used to subvert the Constitution of these United States and its people. I says That is enough. I can't possibly be connected. Oh, well, Mr. Schneider, you can't quit. They said, Well, I says, Yes, I can. I'm an individual, I'm going to quit. And I'm walking off the chairman says, Sorry, I got arrested and casually told Well, you gotta finish your job. And so I, I caved into that part, I finished three weeks and then I, that time, my father was

dying, and I was allowed home and I never went back for my paychecks.

P

Phil Schneider 20:35

don't intend to either. These people are beginning to show signs of being our utmost enemy. I'm talking about military people now engaged in training foreign troops on American soil, clearly against the Bill of Rights in the US Constitution. It's, it's, it's why we formed a government why our forefathers formed a government, a republic of these United States in the first place way back 200 plus years ago. Because the drawing and quartering of soldiers, taxation without representation, law by edict, otherwise known as today's version, Executive Order, among other things, the very reasons that we became in quote, free, a free Republic, a free society, possibly one of the greatest nations to ever be a nation on this earth.

P

Phil 21:42

Were instilled in our founding fathers that are now so far away from the people now running our federal government structure. So I'm here today to touch upon a number of subjects. One being that these underground bases, roughly over three of them per state. There's now instead of 12, prison camps, there's 39. That's almost one per state. They're building to prison camps every seven to seven months. They're building to underground military bases every year. Each one of these military bases, by the way, he's underground military basis, they cost somewhere between 17 and \$26 billion, billion dollars.

P

Phil Schneider 22:37

They employ 1800 to 10,000 workers each. in varying grades of skill. They gobble up totally through the black budget, over one quarter of the black budget or roughly \$310 billion. Of course, you may say, you know where these figures coming from? Well, the black budget, as we know it in black projects, which anything called Black is significant have hidden, hidden from Congress hidden from the American people. And very few people are even in the know about as tall black budget per year Garner's over \$500 billion a year. And that's these kind of huge quantities and sums of monies are garnered through CIA drug activity, National Security Agency clandestine operations, mostly in Panama in South America.

P

Phil 23:48

Now also engaged in Russia and bringing and refining strategic metals. By the way, you might want to ask, where's all these kind of interesting new metals coming? Over here on

the whiteboard, we have the new periodic table, it's got 140 elements. Now in our high schools of today, I was in high school about a week ago. I saw on the periodic table at 105 elements. Somewhere, we're not being told the truth. We're being lied to in every turn in every corner. We're considered less than morons morons.

P

Phil Schneider 24:33

So the government is made itself an entity an independent taxing body an entity unto itself. And does isn't accountable to anybody. Not even the so called New World Order. They just go ahead and do everything willy nilly as they please. There's nobody checking. No have to worry about this. Occasionally. There's a senator pokes a nose in here and air and that Senator finds out either nicely or not so nicely that you don't do things like that. Know, if we're to gain a grip on our country, if we're to take our country back, we must first ask our public officials if they cannot tell us the truth, and we will impeach them or they will be impeached.

P

Phil 25:25

Or they will be tried as traitors. This is pretty stiff language. Already, it's slowly beginning to trickle out. And it will occur to a number of people and this may be the only way out. Also, our founding fathers, George Washington, Patrick Henry, and a few of the other ones came up and said that you don't want to let the beast out of the box. And they were talking about a runaway government, you don't want to allow your government to become like England at that time. And so they warned us about this very same kind of thing. First of all, the United States is not a democracy.

P

Phil Schneider 26:11

It's not a republic anymore. It should be a republic that's to the republic for which it stands one nation under God. By way, we can't even pray in the public schools anymore, we have to have a Supreme Court judge or group of them. Plus, Janet Reno and company. Among other things, telling us what to do interpret for us as if we cannot read with our own two eyes and understand with our mind. This of course, is bad policy all the way around. And we, I guess I don't need to blow that by your ears. Okay, On another subject, I have a number of items up here at the table.

P

Phil 26:54

One of which here is I can show it is heavy hunk of rock indeed. It has a weight of about a little bit more than a pound. Two and a half times the weight of uranium. It's not

radioactive can never be made radioactive. It's composed of, of Earth rare earth clays and powdered metals as well as alien element an alien element. Mostly from crashed retrieved flying saucers and the kind that have happenstance to crash in our deserts and backyards so to speak. It's called mirror nine. This is employed in every stealth aircraft every black jet throughout the black budget. Also in the in the very small quantities in the skins of black helicopters. Mirror night.

P

Phil Schneider 27:55

Here's another thing here's a piece of probably the purest titanium you'll ever hear or see. It's so pure. It's also composed with other alien elements. To make it extremely tough. It's capable of withstanding temperatures in excess of 7000 degrees Fahrenheit. Our new Phoenix class submarines which we're building to a month, right now, Phoenix class submarines is a black budget program, each one of those submarines costing \$208 million just for the titanium hole, which is made of this material, approximately 10,000 pounds of it.

P

Phil 28:43

Now we've got supposedly as of as of the data right now, we've got 106 of these submarines, they're playing the waters and the waves, they can dive to a depth of over 7000 feet and hold that for three months. It's a fantastic submarine has 11 grid bed nuclear motors on engines that run everything. purify the air. By the way, these aren't your usual nuclear motor installation, they're very small are probably no bigger than this podium weighing less than 3000 pounds, putting out as much as the equivalent of three aircraft carriers. So the enterprise class but these Phoenix class submarines are getting this metal now what are we getting the metal it's being stockpiled the numbers strategic locations. Supposedly, I've heard stories Well, it's being mined on the moon and I have no way of proving that one way or another. I think we're probably getting it from Russia

P

Phil Schneider 29:58

or AND and OR refining it in outer space. Are we shuttling basically a shuttle secret shuttle flight? one a week now is going up and back. What are they shuttling? Well obviously they got kind of their own little laboratories up there, Space Station, all this kind of stuff. Remember what you're being told is only just a smattering of the truth it's not the real truth maybe it's 5% of the truth. Maybe it's not even that it can rest assured it's not you're not getting much.

Phil 30:34

And other strategic metal is this particular bar. With some strange crystals on it this k Lino hydro crystals of niobium, titanium rhenium copper oxide, this complex group of elements not found on the earth, and specific quantities This was developed at Los Alamos through eg and G and other outfits are employed in all black jet

Phil Schneider 31:08

aircraft all including the end quote, Sport model and little flying saucer we occasionally see over at groom lake. By the way, now, if we happen to be with a video camera, you know, taking pictures of the so called area around groom lake is now you can you can get your equipment, confiscated your car, your house, considered the same thing as a drug dealer, and you'll go to jail for five years, up to five years, and a million dollar fine. I personally don't think this is what I'm hearing. I just don't think that this kind of punitive ness is what we need in America and we have to get rid of it. Otherwise, we're going to die with no America.

Phil 31:55

Here's some other elements. Here's a very light element. It's composed of lithium metal, as well as a alien element. A little heavier than hydrogen but a little lighter than helium also employed in this. It's used in secretive methods of propulsion. And it also is in a peculiar scalene or hydro crystalline form. And anything scaling Oh, he'd roll and by the way of scaling triangle is no side is equals to another side. The scaling a little hydro metallic crystallin structure is definitely alien. The elements are alien technology converted over to our own technology. These were given to me about a year ago. They're called alien, alien or Aurora drops. It's supposedly the skins of the black jets.

Phil Schneider 32:56

Some of the ones that are coming in at very high rates of speed, they're still glowing, red hot, white hot, and they'll sit out there and cool off and they're dripping their material off of them. And it's kind of like a rubberized coating. It's not rubber, I can tell you that it's as hard as lava rock or harder, capable of standing tremendous temperatures. But nonetheless, some of its sloughs off every time and so they just kind of scoop it up and throw it in the trash can. There are a few pieces of it.

Phil 33:32

Here's one of the hardest. So cold man made rocks. Once again, it's it's it's got a number of alien counterpart to get an alien crystalline structure to it very advanced. It's about 11 times harder than a diamond above 70 times stronger than a diamond capable of standing temperatures in excess of 10,000 degrees Fahrenheit. It is imposed employed as very thin coatings or Windows, tiny windows and hypersonic aircraft aircraft that exceed Mach five.

P

Phil Schneider 34:20

Here's an interesting artifact. Right here in this hunk of rock which by the way was an old 100,000 year old chipping tool found in Syria. Jordan rounders gives me is a imprint of looks like a fossil, but it's not. It's an imprint of a small mechanical part with exactly 360 kind of like rotor blades. Well, this rock is 220 million years old. Who was making machines 220 million years ago. Maybe if I'm Duncan was right after all.

P

Phil 35:00

Here we have a actual piece of advertised fruit, or it's similar to a lime. It's even been pecked by a bird at one time, and that's still there. So it was instantly turned to it is the same agate or chemical structure as material found at Hiroshima and Nagasaki, after the bombings in world war two were grasses and flowers and flower, petals of flowers and other kinds of things were instantly petrified turned to agate, it is the same identical crystalline structure. However, this particular case, is about 20 million years old. And it's still got its original green coating. And it's basically unchanged perfect condition.

P

Phil Schneider 35:47

Likewise, here's a garlic plan about somewhere between 20 and 35 million years of age. And once again, it's got that same pink agate coating. And here are some pieces of the metal skin from the crash disc at Roswell was given to me when I was 14 years old, my father was visiting one of his old friends in the Navy archives, as well as he was in the Royal Navy in England. And I, as a 14 year old boy says, gee, Dad, can I have? Can I ask Johnny something? Oh, go ahead, ask him get anything you can from it. You know, that kind of thing? This is one fee, Johnny? Well, do you think I can have a piece of this metal? Oh, no, no, you can't have that. Oh, give it to the kid What the heck, he won't have it very long anyway, well, I've had it all this time.

P

Phil 36:46

It's kind of a unique thing, they were able to break the scan of that crap, by the way by

dropping it into a bath of liquid nitrogen hitting it with a mechanical or hydraulic hammer, and it shattered into little bits. And it was later analyzed and adapted for our own technology. All these artifacts are fine. But once again, the main part of this talk is where's it all leading to, we get very little spin off to where any of this is leading to. Occasionally we'll get a new computer or maybe a quartz watch or, or some little trinket like, kind of like giving the Indians beads a couple of 100 years ago while we're getting these little spin offs. But the black budget still rolls on garnering up over

P

Phil Schneider 37:39

a trillion dollars every two years. It's somewhere between 1.0 to \$3,000,000,000,001.31 trillion, every two years. And every every year it goes by in the black budget is unchecked and unaccounted for. It's just subverting our country. That's number one. Number two, is that these underground knowledge. First of all, if there was something like a nuclear war, or, or there was a definite enemy out there, where we were going to be under attack, like from China or someplace like that, I could see maybe a couple of dozen underground basis for government.

P

Phil 38:24

So it could theoretically come rise up like the Phoenix out of the ashes. Well, not 131 of these, if you were going to so called round people up and put them in prison camps, or what a better prison camp than underground or nobody knows where it is anyway. So once again, these underground bases are most likely been planned as underground prison camps and slave labor factories for the New World Order, New World Order, by the way, it's getting and I'm probably the only person ever talking about this. The New World Order is taking and the United Nations is taking its

P

Phil Schneider 39:13

orders from Believe it or not, these more powerful, outerspace alien entities, we might call them the large greys or the small greys sinister forces indeed. And you might want to say, well, gee, how come we don't see more of this kind of thing? Well, you can just imagine if you're only being told a 5% or less of the truth, that isn't very much to go on. That's one thing. Another thing is, you don't find very many people coming up here and letting you have hands on experience. I'm going to try and do this to you. However, I do ask you to go out and do your homework and keep doing it. don't necessarily believe in what I'm saying. But get out there.

P

Phil 40:00

And, and talk to people, whether it's just a couple of neighbors or friends or, or something, get out there and talk. Because one will tell two and two will tell foreign and pretty soon you have a whole roomful of people that are in the know. And then from there wonders can work. Well, the reason that as far as changing a black budget, and these clandestine programs, public opinion is only going to be that going to do that, and it's going to take millions of us, but we have to be informed. And to do that, we have to be doing what we're doing now gathering and talking.

P

Phil Schneider 40:43

And, of course, most of us are adults, and can weed out fact from fiction. Most of us are responsible adults, and know the difference between fact and fiction, and how to use it, or how to abuse it. So we therefore have to continue to keep studying and keep talking. If there's just me out there, believe it or not, there aren't very many people like myself out there talking. I've given over 30 talks. And the United States, Canada, Japan,

P

Phil 41:27

went over to England kind of well into Japan kind of illegal came back to same weekend, they flew me in and out, but give a talk to a number of their execs. And they were very interested indeed. Now if I was, if this was all a bunch of poppycock, and hooey and poopoo, I might, I wouldn't be listened to be given an audience by these people. But I have but 13 attempts on my life since the first of this year.

P

Phil Schneider 42:00

I, there's a number of you ladies present so I won't bore you out. But AI has seen some other ones. And there's few other people that have been a few of my other lectures. And they can attest that I have been shot. run off the road, I've been pushed off the road I've mostly shot out and that kind of thing. But being on hand and combat with some of these people. And once again, I'm not in the best of shape anymore, but I still know how to handle myself. And just about ready to wrap things up here.

P

Phil 42:39

But just basically wanted to give you an overview of what's happening. And if we have any questions, we can start asking a few questions. Okay, here's a gentleman way over here. Would you please speak up loud?

P

Phil Schneider 43:05

Yes, I was involved in a in 1979. In August, late August of 1979. I was involved working through Los Alamos laboratories that don't say New Mexico. And what's now known as the alien human war 66 Secret Service agents, government workers, geologists and alike. I almost got bit the dust Oh, it could have been number 67- lost their lives that day, because the government lied and knew full well what was underneath. And what we've done is out in the desert there we were drilled for a period of a couple of days, we drilled four of these holes that went down several 1000 feet. And

P

Phil 43:55

one of these holes kept bringing up dirty dust putrifying odors and broken off, broken off machine bits and other kinds of things like that. Boring machines as well as lasers came up, damaged. First, there was a probe that was sent down, neck came up totally missing. And so people were sent down, and that was one of the people and when I got down there of course the owner was in remember I was in a spacesuit type environment.

P

Phil Schneider 44:30

All I had was a small tool belt with special sensors, a small rock hammer and a rock sack for mineral specimens and things like that. I had my little pistol. Being an engineer didn't have time to carry a big hunk of pistol like most of these green berets carry, stuff like blackberries and kirtle Walther PPK with a nine shot clip as soon as they got down this hole standing about from from me to the street.

P

Phil 45:00

gentleman over here in the front row 10 or so feet away seven feet away something like that was one of these seven foot tall, stinking alien guys, and I didn't waste any time as I'm not fiddling with you guys, and away you go. And I had I was one of the rare few that had been lured that this may or may not occur. And so basically was given et training, but a lot of these other people weren't. And we were, in fact, it was asked, Are there aliens in the area? And of course, the big question was no.

P

Phil Schneider 45:41

And that was a big lie. And of course, 66 people died that day. I have a big hole in my chest, I lost a leg by lung was literally burned out to me. with fingers burned off. I mean, like toenails burnt off. My skin was was an ice and radiation isolation therapy for 400 plus

days. My bones were vitrified or burned. I was cooked. I managed to survive.

P Phil 46:15

here telling you something about it today. Other than that, I'm the only talking survivor. There are only two other survivors and their nursing homes up in Canada, Canada refuses to allow the United States officials to talk to them. They're in very bad shape. One of them can't talk and the other one doesn't want to. So they're they're Canadian, they're regarded as Canadian heroes. So they're being kept by Canada. Okay, this fellow over here.

P Phil Schneider 46:49

Speak up loud.

P Phil 46:55

Actually, is there's several In fact, as I was coming to this talk, I was supposed to be here by plane but there was a subsequent follow up. Anyway, I drove all the way and did it in one day. But as I was coming over, over near Cheyenne there, I noticed that Military Air Force and the army are building a so called New in, quote, boot camp. prison camp, right up in Cheyenne, Brandon, and I was here three months ago that wasn't there.

P Phil Schneider 47:36

So it's something brand new. In Colorado, yes, there's about four underground bases. One being a Denver International Airport. I call it airbase, spaceport or whatever you want to call it. Denver International Airport. No wonder your luggage gets lost. There are eight levels underneath the airport tarmac there end quote tarmac or cement Mack.

P Phil 48:02

And so those bags could be there for a long time. Why? Just imagine if this was the instantly turned 30 or more million years ago, those bags can very well be the same way. So yeah, there's, there's a number of them. And I wish I had a map with me. In fact, subsequent talks, I'll have a map, which will be put on the on the overhead. In fact, my next talk, I plan to have just that. I had planned to bring a map here and had all the latitude and longitude of all the bases and I can't do that would be a nice jail sentence for me. So I I didn't bring it. So but other than that, I'll have that all researched for you.

P Phil Schneider 48:50
Yes, this this one.

P Phil 49:05
Yes. there as far as there being an Inner Earth, a hollow earth or anything like this. No, I've never run into anything like that. However, Al Bielek has been on these tunnels trains, better part of Mach two, going from coast to coast an hour and a half faster than any jet plane and we got including the SST or thereabouts the same rapid speed. But I helped build a lot of these tunnels and all of the underground mount, underground mountain or military bases are connected. All of them all 131. They're connected both by road, not a big freeway under there, but that's at least a two to a four lane road. rather narrow lanes, but they're there and They're also high speed. Magneto lobaton. Train tunnels. Yes, this lady over here.

P Phil Schneider 50:08
stand up and speak up, please.

P Phil 50:17
What? What levels of military personnel know about this? Most of the levels of military know about this, especially the higher levels. Officer higher officer levels. The enlisted, I'm sure don't are basically kept in the dark like we are end quote we are. So yeah. This fella right here with the hat. Adam

P Phil Schneider 50:48
Well, there's 131 of them in the in the United States, 127 of them in the lower 48. There's some in Canada, I'm not counting those are some in northern Mexico. And that kind of goes either. They average about four and a quarter cubic miles hollowed out underground on average depth of 5700 feet underground. average cost 17 to \$31 billion each. They employ anywhere from 1800 to 10,000 people. Some very large ones now being built in Sweden, one of which is repudiated to be 30 cubic miles, it will take five years to build that one at a cost of about \$2 trillion.

P Phil 51:45
And that's all being supplied by the United Nations. Yes, anybody over here? This

gentleman, speak up, please.

P

Phil Schneider 52:01

Okay, you want to know exact locations of all as well for where all of your army, Marine Corps, Navy, and Air Force bases are there with all this present, not the ones closed in, by the way that closed down basis are now being used for gasoline storage and equipment storage and these kind of things. So they're not really close down yet. boot camps and quote, boot camps and all this kind of stuff. So called prisoner camps and these kind of things.

P

Phil 52:35

Right now, our police, for instance, or training, are being trained by the Air Force and the Army Intelligence and in martial law research, as they call it, how dare they call that? That by that name, where these are there, where every one of these strategic bases are in Colorado, and in around Denver, there's three of them. And they're fairly small. Some of these bases are only maybe two to 3000 feet in depth. Some of them are they were built a long time ago back Go 3540 years ago, and they're only maybe 500 feet and they're mostly for equipment storage.

P

Phil Schneider 53:20

Denver and then there's Fort Collins. There's also Colorado Springs area as an operator. By the way, Colorado Springs a kind of a famous area, Nikola Tesla's laboratories are in Colorado Springs. And the Need I say more I'll leave that up to I'll be like, as far as Nellis Air Force Base, there's nine underground mountain bases and Nellis Air Force Base that's in Nevada. It's north of Las Vegas. There's going to be a UFO show and conference in mesquite here later on this month, that's very close to end quote, area 51.

P

Phil 54:05

That whole area by the way, the state of Nevada is 81% end quote, a managed or owned by the federal government land is either restricted or run by the federal government. That's why they have there's groups rising as we speak, dealing with a problem. Very vociferously. senators are now getting involved. So evidently waking up is occurring.

P

Phil Schneider 54:34

Yes this gentleman over here. Speak up please.

P

Phil 54:44

Okay. Yes, they are. The gentleman asked Are these tunnels connected to large caverns? Yes, these large bases are basically like this. Like this Coliseum. Everything's underground. Everything's a city underground. Most most of these bases have our both have military bases and they have all the accoutrements of life. Remember each one of these costs quite a bundle of dough and and some of it in our tax money, but most of it in clandestine approaches and that's definitely undermining the country. Yes. Some of them have difficulty in understanding our language, it's too slow to them.

P

Phil Schneider 55:43

If you've heard whale songs or bird chirping at high speed, it's about what these aliens sound like audibly to us. So they did it's a bunch of gibberish. Yes, they slowly actually broken down there's 11 prototypes that are 11 civilizations of aliens visiting this planet all the time, all of which are known by the US military, nine of which are not very good India, they're pretty bad news. Two of which are benevolent, but the benevolent ones have supposedly left. They have their own little war of sorts, especially for plantation

P

Phil 56:23

groups and whatnot like that, of where Chevelle Thor was repudiated to be of a newseum, but other people will alert he looks more like play addition. It looks normal human except these get six fingers and toes. He's gonna one lump oversize long. It's got two hearts, he's got all kinds of weird stuff. bones are bigger. Yeah.

P

Phil Schneider 56:52

The man asked Do I tie in the Alien Agenda to the new world order? Yes, sir. 100%. I can elaborate briefly. The New World Order right now, basically, is dismantling countries. Governments telling governments not to war with each other anymore, basically. So it looks good on the outside. They're taking their orders directly from the aliens, who've got their own timetable. They want the One World Order because they want the planet for themselves.

P

Phil 57:26

Of course, you've often heard of the term global 2000 opposes sinister plot, or has been a group of sinister plots to produce biological weaponry to reduce or thin out the so called ethnic cleansing the population of the planet by five, six, or roughly five of 6 billion people

in slaving the rest to work willy nilly with a so called people the New World Order. Now the another peculiar thing is, the Alien Agenda

P

Phil Schneider 58:03

is not really well believed nor understood by a lot of these one worlders. They don't believe it, they think they've been singled out for their own glory. And what they don't know is they're just another human being. And according to the negative or bad aliens, they're just another word considered bags of food to them. They don't eat us, like we think of a cannibal eating a hunk of meat, but they use our glandular secretions as part of their food, bass or blood. There are glandular secretions like adrenal chrome and other kinds of things like this. And, in fact, even the Atlanta Center for Disease Control has figured out ways that we can combat this and it might be where these new designers diseases like aids and Ebola virus and all these kinds of things have come up out of nowhere. And these diseases in quote, almost have a mind of their own. Has this lady here.

P

Phil 59:17

Okay, lady asked, Is the tunnel building, having an effect with earthquakes?

P

Phil Schneider 59:26

Yes, it could very easily be although, gotta remember, a lot of these underground bases are constantly being repaired. And so a lot of people have to be hired as far as the US government. second part of your question was the US government modifying our weather? Yes, that's an affirmative. And we have the US government's been working with the Russians for at least since 1972. And maybe as early as 1966 on whether modification and the well known fact. And it's well employed. And by the way, they can literally weather modify a hurricane or a tornado out of existence.

P

Phil 1:00:14

And the reason they don't do it is pretty obvious and right or they could actually send a plane inside of a hurricane for instance that would blow off atmospheric bomb or a shockwave bomb in the eye of the thing it would completely dissipate when we don't do this of course there's probably other reasons for that. see which way it goes or what kind of havoc and how we can study to have a Can we go from there? This fell away in the back in the black.

P Phil Schneider 1:00:49

How do we learn more about our general topic? Well, there's this particular fellow His name is Richard Souter, PhD wrote a book recently, underground bases and tunnels what is the government trying to hide? That is one book. Then we have other here's a popular science article secret airbase, the government doesn't want you to know that groom Lake supposedly groom Lake doesn't exist. Well, I guess if it doesn't exist, and me talking about I guess I can't be arrested or anything. I'm just full of poppycock here. Well, editor Papa, one of the editors of popular science and put this article out is now in federal prison.

P Phil 1:01:30

Then there's a book, the stealth fighter pilot. These books are available, I got this one adult ones. This one actually was sent to me by the publisher. I did some test piloting and the only thing I test my windows would run the aircraft back and forth on the runway, the special runways are built at groom lake. There's a picture of me in uniform. And I can go on and these publications are out now and they're available.

P Phil Schneider 1:02:04

Yes, this lady over here.

P Phil 1:02:14

I can't hear you what.

P Phil Schneider 1:02:32

Okay. Okay, that's kind of a mixed bag question there. She has, with martial law being called will precious metals and all these kinds of things. First of all hoarding anything will be outlawed. If you hoard food, have a radio, any way of communicating stash gasoline, these kind of things you would just be rounded up. Martial Law is martial law, martial law is dictatorship for the worst form, or one of the worst forms? And her other part of the question if I if I got it right was when's the alien takeover? Well, the alien takeover right now and probably will be for some probably in the next 20, maybe 3040 years will be basically in the in in the background. The idea is to get the One World beast like government order in place, and to thin out the population of the planet. And then of course, Then all hell will break loose from then on. And whether it is I don't often mix Bible and talk but some people have learned well this is already mentioned in the Bible, blah blah and all this kind of stuff. Well, that may be but all I can tell you is

Phil 1:03:57

I've been face to face with one of these sinister characters are a couple of them and thing last and most people would just the shock of them seeing such a thing with the cause them to not be in very healthy mode frame of mind and physical as well as mental. This man here in blue cup.

Phil Schneider 1:04:28

Oh, it's a combination. What technology is used to build these underground bases? Well, we have lasers that can drill out or basically the flag rate or melt out a tunnel seven miles a day. And that tunnel is 28 feet wide. 28 feet high. They have you been told about drilling and boring machines and a very slow quarter of a mile a day. Most of that went out and War two most of that's Old World War One or World War Two era materials. And once again, you've been badly lied to, I can hardly believe First of all, I've worked on public engineering projects, and we do better in grinding up roadbeds and Reed, laying them down at the rate of four miles a day. And supposedly that doesn't exist while I work

Phil 1:05:26

in the state of Oregon just few months ago, and we built a tunnel for sewage tunnel and whatnot. Like that wasn't very big, it's about six feet across and about drilled right through solid rock right to base of under one of the hills in Portland, for their new light rail. Did that in two days. But it was a complex It was a small complex tunnel was big enough for a man to crawl through and inspect. I was one of the people that inspected so yeah.

Phil Schneider 1:05:59

What technology a lot of this is alien technology readapted for our own use, but a lot of it's our own ingenuity to. So you can bet How can you tell alien technology? Why do you think that's just absolutely outlandish, like taking a oxy acetylene welding torch and trying to cut into this metal and getting nowhere obviously would be metals research. aircraft or searching the like different tools and products. So true things later. Many times the hardness of diamond or known hardened substances substances like orizon.

Phil 1:06:45

Obviously, that's nothing that we came up with on our own. Well, we could have over several 100 year period. But you got to remember, too, that the military technology is outstripping the public sector technology at the rate of 44 to 45 years of technology for

every calendar year, every 12 month calendar year here, sorry, a year going by, by this time in 1996, the military technology will be roughly 45 years more advanced than where we are today. So it's quite possible that way back in 1943, the US Navy not only caused the ship to disappear, it literally disappeared, and reappeared.

P

Phil Schneider 1:07:36

Basically military technology right now is about 1200 years more advanced than public state technology, and computer technology right now. It's off the scale, I can't tell you it's just right now, and employing just in black jet and stealth aircraft. The new computers are so completely advanced. We couldn't get them in the public sector for probably another 40 or 50 years. Yes, this lady here.

P

Phil 1:08:22

Well, the lady asked with a slave labor camp. So the old the infirm, the handicapped, are they going to be executed? Actually will be executions? You can bet your bottom dollar there actually will be these things. I wish I knew more. But I don't have my own agenda to kind of keep up and talk about. But other than that, yes, I would imagine so if you look at all the 39 prison camps that are presently built. They're called boot camps By the way, and of course, these new trains that they have that have 143 shackle placements per train.

P

Phil Schneider 1:09:07

Why? They're scary thing indeed. You know what they're called? They're called United Nations prisoner transfer cars. Oh, I'm sorry, appropriate name, I guess. Well, we got to wrap it up here. They're telling me it's time. I'll take one more question. This lady over here.

P

Phil 1:09:29

No brainwash, they don't brainwash you. How do they brainwash 18,000 people that are working?

P

Phil Schneider 1:09:38

Well, you sign this whole piece of paper saying you work, you go to prison for the rest of your days. Or you're not going to be taking home a paycheck of about anywhere from 4000 to 40,000 per month, depending upon your position.

Phil 1:09:53

40,000 a month, a lot of Petunia. Okay, I gotta wrap it up here, folks. So I'll be over in AI Billings booth. I think it's over in number booth number 125. I could take other questions there and let you take a look at artifacts and once again on these artifacts and the read through minutes, don't handle them. Just look at them.

Phil Schneider 1:10:19

Thank you very much.
